INVESTMENT POLICY OF THE FUND:

The fund aims to share in the yields on equity markets in the Asian region, and to profit from the region's economic growth through share price gains and dividend income. Given the risk profiles of the equity investments, the fund is classified as a high-risk investment. The fund invests its capital in equity-type instruments of the target countries. The fund aims to create an opportunity for investors to invest in equity markets that are representative of the Asian economies. The most important target countries are Hong Kong, India, China, South Korea and Taiwan, but the fund also invests in the capital markets of other Asian countries. This may be achieved through the purchase of individual shares or through collective investment instruments. The fund plans to invest predominantly in the latter, and accordingly, it primarily buys into exchange-traded funds (ETFs) and open-ended public investment funds. In accordance with our obligation under law, we draw the attention of all investors to the fact that the fund is a fund that invests in other investment funds; in order words, in accordance with its investment policy it may invest more than 80 percent of its assets in investment fund shares or securities issued by other collective investment instruments. However, the fund's portfolio will not contain shares of any single investment fund in a weight of over 20%. The fund only invests in investment vehicles whose expense ratio is less than 2.5%, though it always strives to ensure that the overall average fee burden does not exceed 1%.

MARKET SUMMARY:

Stock markets have staged a rally in October after sharp declines in August and September.

Both the FED and the ECB left interest rates unchanged. The FED signaled a possible rate increase at its next meeting while the ECB is willing to cut interest rates and

Expectations for additional stimulus in Japan increased somehow as weak macro data came out during the month. After all, BoJ left the monetary policy stance unchanged at the end of October and lengthen slightly the time horizon to achieve 2% inflation target. Chinese 13th 5-year plan were announced at the end of October. According to the plan a minimum annual growth rate of 6,5% should be achieved from 2016 to 2020. All Asian equity markets rose during October and Indonesia, Japan and China proved to be the strongest in USD terms.
