Net Asset Value of PLN series:	16,677,269 PLN
Net Asset Value per unit:	1.119556 PLN

INVESTMENT POLICY OF THE FUND:

The fund's aim is to assemble an investment portfolio for its investors that is comprised of both Hungarian and international money and capital-market instruments, which the fund can optimise through ongoing dynamic asset allocation in order to attain the highest possible yield. The fund is a 'total-return fund', which means that instead of concentrating on just one subsector of the money or capital market, at any given moment it focuses its investments on the area that holds the promise of the highest possible return. Accordingly, the fund may hold government securities and discount treasury bills issued by the State Debt Management Centre (ÁKK) on behalf of the State of Hungary, as well as bonds issued by the National Bank of Hungary, and also bank and corporate bonds that are low risk but are nevertheless likely to earn a higher return than government securities. Besides these the fund's portfolio may also contain shares listed on the domestic stock exchange and the bourses of OECD countries, as well as the government securities, bank and corporate bonds of OECD countries. The fund does not follow a fixed benchmark, and does not adhere to a permanent ratio of shares to bonds, but aims to constantly change this ratio within a broad range; indeed, it is also prepared to take on currency risk (just as international bond/equity funds tend to) through the purchase of international government securities and equities. At the same time, the fund maintains the option to hedge currency risks.

RISK INDICATORS FOR THE LAST 12 MONTHS:

Annualized standard deviation of the fund's weekly yields: 2.08 %
Annualized standard deviation of the benchmark's weekly yields: 0.27 %

MARKET SUMMARY:

Risk markets recovered, prospective further easing from ECB was particularly well received by markets. Equities, EM performed well while core market yields stayed low. We had low equity exposure in the fund, favouring Europe. The global economy is still vulnerable, valuations are not attractive, but the rally induced by improved market sentiment may have further legs. We closed our Turkish exposure partly before the elections but still have some open TRY longs hoping for a market positive outcome. There were only minor moves in the credit portfolio. In HGBs, we switched short/mid curve paper to long end tenors, risk weighted. We still see the current global environment as bond-friendly, we take long equity exposure only tactically.

ASSET ALLOCATION OF THE FUND ON 10/31/2015
