Total Net Asset Value of the whole Fund:	2,284,218,592 HUF
Net Asset Value of EUR series:	142,956 EUR
Net Asset Value per unit:	1.155444 EUR

## INVESTMENT POLICY OF THE FUND:

The fund aims to share in the yields on equity markets in the Asian region, and to profit from the region's economic growth through share price gains and dividend income. Given the risk profiles of the equity investments, the fund is classified as a high-risk investment. The fund invests its capital in equity-type instruments of the target countries. The fund aims to create an opportunity for all investors to invest in equity markets that are representative of the Asian economies. The most important target countries are Hong Kong, India, China, South Korea and Taiwan, but the fund also invests in the capital markets of other Asian countries. This may be achieved through the purchase of individual shares or through collective investment instruments. The fund plans to invest predominantly in the latter, and accordingly, it primarily buys into exchange-traded funds (ETFs) and open-ended public investment funds. In accordance with our obligation under law, we draw the attention of all investors to the fact that the fund is a fund that invests in other investment funds; in other words, in accordance with its investment policy it may invest more than 80 percent of its assets in investment fund shares or securities issued by other collective investment instruments. However, the fund's portfolio will not contain shares of any single investment fund in a weight of over 20%. The fund only invests in investment vehicles whose expense ratio is less than 2.5%, though it always strives to ensure that the overall average fee burden does not exceed 1%.

## RISK INDICATORS FOR THE LAST 12 MONTHS:

Annualized standard deviation of the fund's weekly yields: 26.29 %  
Annualized standard deviation of the benchmark's weekly yields: 24.60 %

## MARKET SUMMARY:

November has been another poor month for commodities with Silver, Brent and Copper declining around 10%. Investors focused on the divergence of monetary policy in the US and EU, causing a very steep decline in the EURUSD rate. The Paris terror attacks haven't caused panic on global stock markets. The best performers in the month were the German DAX and the Japanese Nikkei.

We are negative on India as the results of the November state election is a further setback for Prime Minister's reform agenda. Japan is the only one in the Asian region that has positive earnings trend. We are still positive on Japan equities.

## ASSET ALLOCATION OF THE FUND ON 11/30/2015
