INVESTMENT POLICY OF THE FUND:

The objective of the fund is to invest in Central and Eastern European equities. The fund is offered for investors who would like to benefit from the long term performance of regional listed companies. The average equity exposure of the fund is 95%. A primary consideration when compiling the fund's portfolio is the need to optimize the aggregate risk of the securities to be included in the fund. In the interest of reducing the risk, the utmost care is taken when selecting the securities to include in the fund's portfolio. The fund buys shares issued by corporations from countries in the Central European region (primarily Hungary, Poland, the Czech Republic, Romania, Slovenia and Croatia, and secondarily, Austria, Russia and Turkey), but it may also invest in the shares of companies in other emerging and developed countries, as well as in other collective investment securities. The fund may hedge a part or all of its currency risks with forward currency positions. To ensure liquidity the fund aims to hold in its portfolio the government securities on behalf of the State of Hungary and bonds issued by the National Bank of Hungary, but in accordance with the statutory regulations the proportion of shares in the portfolio may be up to 100%.

MARKET SUMMARY:

November has been another poor month for commodities with Silver, Brent and Copper declining around 10%. Investors focused on the divergence of monetary policy in the US and EU, causing a very steep decline in the EURUSD rate. The Paris terror attacks haven't caused panic on global stock markets. The Hungarian market closed an excellent month, the BUX index rose 10%. This was an exception in the CEE area. In Poland the WIG20 index suffered (-7%) from uncertainty over the introduction of new taxes on banks and supermarkets. In Romania, after mounting pressure, PM Ponta resigned in early November.
