Net Asset Value of PLN series:	16,570,983 PLN
Net Asset Value per unit:	1.002437 PLN

## INVESTMENT POLICY OF THE FUND:

The objective of the Fund is to provide capital return for the investors within the appropriate risk limits. The aim of the Fund is to achieve the highest possible return for a given risk level by buying undervalued stocks and fixed income assets and selling overvalued instruments. The Fund is allowed to buy shares, bonds and other instruments, to open short positions on the spot market, to take long and short forward and future positions. Moreover, the Fund can trade on the option market. The portfolio of the Fund is separated into three classes according to their investment objective: Instruments of the first class consist of long positions of long term, fundamentally undervalued, and short positions of overvalued equities. The method of stock picking is identical with the applied methods of Aegon equity related funds and mainly concentrate to the CEE regional markets, although the Fund is allowed to invest in other emerging and developed market instruments. The second class of the Fund's instruments implement the top-down equity strategy of Aegon Asset Management Co., mainly with long and short positions on the futures markets. These positions are based on the scores of the so-called "quadrant model", which is the internal asset allocation model of the Asset Management Company. Instruments of the third class involve the fixed income part of the Fund. The aim of the third class is to reach or exceed the performance of the RMAX Index. The target weight of the first and second classes altogether is 45%.

## RISK INDICATORS FOR THE LAST 12 MONTHS:

Annualized standard deviation of the fund's weekly yields: 1.05 %

Annualized standard deviation of the benchmark's weekly yields: 0.05 %

## MARKET SUMMARY:

November has been another poor month for commodities with Silver, Brent and Copper declining around 10%.

Investors focused on the divergence of monetary policy in the US and EU, causing a very steep decline in the EURUSD rate.

The Paris terror attacks haven't caused panic on global stock markets.

The best performers in the month were the German DAX and the Japanese Nikkei.

In the first half of the month, Maraton fund could rise, but as regional equities started to correct in the second half of the month, the fund also gave back some gains.

Thanks to the short position in Polish equities and that we had a lower equity exposure than usual in the second half of the month, the fund could still finish the month in the green.

## ASSET ALLOCATION OF THE FUND ON 11/30/2015
