Net Asset Value of HUF series:	2,114,293,661 HUF
Net Asset Value per unit:	1.373312 HUF

INVESTMENT POLICY OF THE FUND:

The fund aims to share in the yields on equity markets in the Asian region, and to profit from the region's economic growth through share price gains and dividend income. Given the risk profiles of the equity investments, the fund is classified as a high-risk investment. The fund invests its capital in equity-type instruments of the target countries. The fund aims to create an opportunity for investors to invest in equity markets that are representative of the Asian economies. The most important target countries are Hong Kong, India, China, South Korea and Taiwan, but the fund also invests in the capital markets of other Asian countries. This may be achieved through the purchase of individual shares or through collective investment instruments. The fund plans to invest predominantly in the latter, and accordingly, it primarily buys into exchange-traded funds (ETFs) and open-ended public investment funds. In accordance with our obligation under law, we draw the attention of all investors to the fact that the fund is a fund that invests in other investment funds; in other words, in accordance with its investment policy it may invest more than 80 percent of its assets in investment fund shares or securities issued by other collective investment instruments. However, the fund's portfolio will not contain shares of any single investment fund in a weight of over 20%. The fund only invests in investment vehicles whose expense ratio is less than 2.5%, though it always strives to ensure that the overall average fee burden does not exceed 1%.

Annualized standard deviation of the benchmark's weekly yields:	22.76 %

MARKET SUMMARY:

In December the ECB and the FED both held interest rate decision meetings. The FED successfully conducted the first rate hike in the US since 2006, without triggering highly volatile movements on the market. On the other hand the ECB, although continued with easing, hasn't met market expectations.

Oil prices have been falling heavily. Prices fell below USD 38 per barrel for the first time since 2008/2009.

In December the yuan hit new lows, the devaluation of the Chinese currency induced fear on the markets again. In the first half of the month, Chinese H-shares fell, after the FED decision they started to recover. The Bank of Japan announced steps to further bolster its stimulus program and to increase purchasing equities, yet the markets couldn't materially rise on the news.
