Net Asset Value of HUF series:	35,246,578,776 HUF
Net Asset Value per unit:	4.902567 HUF

INVESTMENT POLICY OF THE FUND:

The fund is intended to serve as a stable, moderately low-risk form of investment, and to offer investors higher returns than bank deposits over the medium term. The portfolio elements are selected in accordance with the above principles. To ensure liquidity, the fund primarily aims to hold bonds and discount treasury bills issued by the State Debt Management Centre on behalf of the State of Hungary, as well as bonds issued by the National Bank of Hungary. The fund has a low risk profile, but its portfolio may also contain forint-denominated debt securities issued by banks and corporations, which are expected to yield a higher return than government securities. The fund may also keep its liquid assets in bank deposits. Besides this, the fund may hold a limited proportion of foreign-currency instruments in its portfolio, but only subject to the full hedging of currency risk. Aegon Domestic Bond Fund must hold minimum 80% of its assets in HUF-denominated bonds issued by the members of European Economic Area.

MARKET SUMMARY:

The last month of the year was eagerly awaited as the ECB and the FED both held interest rate decision meetings. While the ECB could not meet the market expectations induced by itself, the FED successfully conducted the first rate hike in the US since 2006, without triggering highly volatile movements on the market. The Hungarian market was more impacted by the ECB as domestic bonds followed weakening European bonds when sentiment turned into negative after the ECB meeting. Yields increased by 40 basis points almost all along the curve until mid-December. As markets stabilized after the FED rate hike, yields decreased, closing the month at nearly unchanged levels compared to the beginning of December, while short-end yields closed slightly above their opening levels.
