Currency:	EUR
Total Net Asset Value of the whole Fund:	776,414 EUR
Net Asset Value of EUR series:	776,414 EUR
Net Asset Value per unit:	0.999110 EUR

## INVESTMENT POLICY OF THE FUND:

The fund aims to grow the euro-based savings invested in it through returns that exceed the interest rates attainable on bank deposits. The fund is a money-market fund with a broad investment policy, issued in euro, which combines the fund management company's emerging-markets expertise with the safety of classic money-market funds. The fund may invest in the investment instruments permitted by law, with special regard to the money and bond markets. The fund may not hold shares. The fund's investment focus is on short-term government and corporate euro bonds. In the interest of achieving a stable traded price and low volatility we keep the fund's interest risk low; the fund's average modified duration may not exceed one year. Besides traditional money-market instruments (treasury bills, government securities), the fund aims to ensure a higher yield than that of traditional money-market instruments by purchasing mortgage and corporate bonds, and by taking advantage of the premiums that these offer. When selecting these instruments the fund sets strict quality requirements, and may not hold securities that are below investment-grade or do not have a credit rating, except for bonds issued or guaranteed by the State of Hungary. The fund can only open long positions, and is not permitted to open uncovered short positions. It may only open forward contracts for the purposes of hedging or portfolio optimisation. The fund may not use leverage. The fund aims to choose as freely as possible among the opportunities available in the domestic and international capital markets, exercising the caution that is consistent with the fund's investment strategy. The fund records its assets in euro, and endeavours to fully hedge its exposures in other currencies.

## RISK INDICATORS FOR THE LAST 12 MONTHS:

Annualized standard deviation of the fund's weekly yields: 0.07 %  
Annualized standard deviation of the benchmark's weekly yields: 0.01 %

## MARKET SUMMARY:

The end of 2015 for the bond markets was not a success story, as most instruments in the asset class had negative performance in December. The last month of the year was eagerly awaited as the ECB and the FED both held interest rate decision meetings. As the ECB could not meet the market expectations induced by itself, the FED successfully conducted the first rate hike in the US since 2006, without triggering highly volatile movements on the market. Meanwhile, fuel prices continued their fall as the WTI dropped by 11.1% and Brent devaluated by 17.6%. USD denominated emerging market bonds fell by 1.39% during the last month of the year, thus tempering their full year return to +1.18%.

## ASSET ALLOCATION OF THE FUND ON 12/31/2015
