Net Asset Value of PLN series:	15,790,238 PLN
Net Asset Value per unit:	0.983614 PLN

INVESTMENT POLICY OF THE FUND:

The objective of the Fund is to provide capital return for the investors within the appropriate risk limits. The aim of the Fund is to achieve the highest possible return for a given risk level by buying undervalued stocks and fixed income assets and selling overvalued instruments. The Fund is allowed to buy shares, bonds and other instruments, to open short positions on the spot market, to take long and short forward and future positions. Moreover, the Fund can trade on the option market. The portfolio of the Fund is separated into three classes according to their investment objective: Instruments of the first class consist of long positions of long term, fundamentally undervalued, and short positions of overvalued equities. The method of stock picking is identical with the applied methods of Aegon equity related funds and mainly concentrate to the CEE regional markets, although the Fund is allowed to invest in other emerging and developed market instruments. The second class of the Fund's instruments implement the top-down equity strategy of Aegon Asset Management Co., mainly with long and short positions on the futures markets. These positions are based on the scores of the so-called "quadrant model", which is the internal asset allocation model of the Asset Management Company. Instruments of the third class involve the fixed income part of the Fund. The aim of the third class is to reach or exceed the performance of the RMAX Index. The target weight of the first and second classes altogether is 45%.

MARKET SUMMARY:

In December the ECB and the FED both held interest rate decision meetings. The FED successfully conducted the first rate hike in the US since 2006, without triggering highly volatile movements on the market. On the other hand the ECB, although continued with easing, hasn't met market expectations.

Oil prices have been falling heavily. Prices fell below USD 38 per barrel for the first time since 2008/2009.

Although Maraton fund had a lower than targeted exposure to risk assets it couldn't escape from the correction in December. The fund mostly held undervalued regional equities and hedged them with equity short positions. We aim to keep a low risk level during current circumstances looking for better entry levels.

ASSET ALLOCATION OF THE FUND ON 12/31/2015
