Net Asset Value of PLN series:	15,543,068 PLN
Net Asset Value per unit:	1.114439 PLN

INVESTMENT POLICY OF THE FUND:

The fund's aim is to assemble an investment portfolio for its investors that is comprised of both Hungarian and international money and capital-market instruments, which the fund can optimise through ongoing dynamic asset allocation in order to attain the highest possible yield. The fund is a 'total-return fund', which means that instead of concentrating on just one subsector of the money or capital market, at any given moment it focuses its investments on the area that holds the promise of the highest possible return. Accordingly, the fund may hold government securities and discount treasury bills issued by the State Debt Management Centre (ÁKK) on behalf of the State of Hungary, as well as bonds issued by the National Bank of Hungary, and also bank and corporate bonds that are low risk but are nevertheless likely to earn a higher return than government securities. Besides these the fund's portfolio may also contain shares listed on the domestic stock exchange and the bourses of OECD countries, as well as the government securities, bank and corporate bonds of OECD countries. The fund does not follow a fixed benchmark, and does not adhere to a permanent ratio of shares to bonds, but aims to constantly change this ratio within a broad range; indeed, it is also prepared to take on currency risk (just as international bond/equity funds tend to) through the purchase of international government securities and equities. At the same time, the fund maintains the option to hedge currency risks.

MARKET SUMMARY:

The end of 2015 for the bond markets was not a success story, as most instruments in the asset class had negative performance in December. The last month of the year was eagerly awaited as the ECB and the FED both held interest rate decision meetings. As the ECB could not meet the market expectations induced by itself, European equity markets fell significantly, also hurting the performance of the Fund. Two weeks later, the FED successfully conducted the first rate hike in the US since 2006, without triggering highly volatile movements on the market. Markets were expected to stabilize after these two main risk events, thus emerging market equity weight of the Fund was raised after the FED decision.

ASSET ALLOCATION OF THE FUND ON 12/31/2015
