Net Asset Value of EUR series:	2,640,634 EUR
Net Asset Value per unit:	3.502371 EUR

INVESTMENT POLICY OF THE FUND:

The objective of the fund is to invest in Central and Eastern European equities. The fund is offered for investors who would like to benefit from the long term performance of regional listed companies. The average equity exposure of the fund is 95%. A primary consideration when compiling the fund's portfolio is the need to optimize the aggregate risk of the securities to be included in the fund. In the interest of reducing the risk, the utmost care is taken when selecting the securities to include in the fund's portfolio. The fund buys shares issued by corporations from countries in the Central European region (primarily Hungary, Poland, the Czech Republic, Romania, Slovenia and Croatia, and secondarily, Austria, Russia and Turkey), but it may also invest in the shares of companies in other emerging and developed countries, as well as in other collective investment securities. The fund may hedge a part or all of its currency risks with forward currency positions. To ensure liquidity the fund aims to hold in its portfolio the government securities on behalf of the State of Hungary and bonds issued by the National Bank of Hungary, but in accordance with the statutory regulations the proportion of shares in the portfolio may be up to 100%.

Risk and Reward Profile:

MARKET SUMMARY:

Equity markets mirrored crude oil movements in February starting the month with a steep selloff. Regardless of the swelling inventories, crude oil managed to recover from decade-lows during the second half of the month supported by the newsflow of huge E&P capex cutbacks and a forming production freeze agreement among OPEC members and Russia. European banks were hit hard on fears of profitability issues and low oil prices triggering provisions. European indices once again lagged behind the S&P500 in February regardless of the somewhat healthier macro prospects. Precious metals kept surging in the risk-off environment, industrial metals managed to recover during the second half of the month.

Equity indices performed mixed in the region. The Polish equity market rose the most, while the Czech market were the weakest. Regarding Polish individual names, CCC and KGHM reached outstanding performance. CCC were bought on record sales increase in January, while the rose of KGHM shares was due to a broader rally in mining equities.

ASSET ALLOCATION OF THE FUND ON 02/29/2016
