Net Asset Value of HUF series:	31,852,940,473 HUF
Net Asset Value per unit:	2.609317 HUF

INVESTMENT POLICY OF THE FUND:

The fund's aim is to assemble an investment portfolio for its investors that is comprised of both Hungarian and international money and capital-market instruments, which the fund can optimise through ongoing dynamic asset allocation in order to attain the highest possible yield. The fund is a 'total-return fund', which means that instead of concentrating on just one subsector of the money or capital market, at any given moment it focuses its investments on the area that holds the promise of the highest possible return. Accordingly, the fund may hold government securities and discount treasury bills issued by the State Debt Management Centre (ÁKK) on behalf of the State of Hungary, as well as bonds issued by the National Bank of Hungary, and also bank and corporate bonds that are low risk but are nevertheless likely to earn a higher return than government securities. Besides these the fund's portfolio may also contain shares listed on the domestic stock exchange and the bourses of OECD countries, as well as the government securities, bank and corporate bonds of OECD countries. The fund does not follow a fixed benchmark, and does not adhere to a permanent ratio of shares to bonds, but aims to constantly change this ratio within a broad range; indeed, it is also prepared to take on currency risk (just as international bond/equity funds tend to) through the purchase of international government securities and equities. At the same time, the fund maintains the option to hedge currency risks.

RISK INDICATORS FOR THE LAST 12 MONTHS:

Annualized standard deviation of the fund's weekly yields:	1.90 %
Annualized standard deviation of the benchmark's weekly yields:	0.32 %

MARKET SUMMARY:

Markets fell further for the first weeks of February, while changed their way to North by the middle of the month, driven by stabilizing crude prices. However, uncertainty remained elevated. Provided the latter fact, and the high level of volatility on the equity markets, equity exposure of the Fund was limited to the small domestic holdings, and we went on seeking for opportunities mainly on the bond market. US corporate spreads seemed to price a significantly larger fall on the markets than equities did, thus a spread tightener position was opened. As the EU periphery spreads started to loosen on Portugal elections and the lack of clarity concerning the stability of the Italian banking system, we took the chance to open a spread tightener in Spanish govies versus Bund. As the political noise started to decrease in Poland, we also found Polish assets attractive and increased Polish duration, took a position in PLNHUF, and purchased the bonds of PZU, the largest insurer.

ASSET ALLOCATION OF THE FUND ON 02/29/2016
