Net Asset Value of HUF series:	7,711,977,699 HUF
Net Asset Value per unit:	1.439147 HUF

INVESTMENT POLICY OF THE FUND:

The aim of the fund is to create for its investors an investment portfolio that generates a positive yield under all circumstances; in other words, it takes a 'total return' approach. It does this by using various analysis techniques to select the asset classes and investment funds that have the greatest potential to appreciate in value, and by investing in the shares of investment funds and in collective investment securities. The fund primarily invests its capital in the funds managed by Aegon Hungary Investment Fund Management, but it may also purchase other investment funds and collective investment securities for its portfolio for the purpose of diversification, if the given asset class is not yet covered by the fund management company's own funds. Indirectly, the fund is capable of accessing the entire known investment universe of today through the purchase of investment fund shares (in bond markets, money markets, equity markets, property market, private equity, derivatives and other regulated and OTC derivative products, commodity-market products, currencies etc.), and of making its investments both at domestic and international level. To ensure liquidity, the fund may hold discount treasury bills and government bonds issued by the State Debt Management Centre (ÁKK), interest-bearing securities guaranteed by the State of Hungary, and bonds issued by the National Bank of Hungary. In order to achieve a positive yield, the fund makes active use of risk management procedures and carefully selects the position size of its riskier investments. Since the range of investments includes foreign currency-denominated investments, ETFs and investment fund shares, investors in the fund are also exposed to currency risk. In accordance with our obligation under law, we draw the attention of all investors to the fact that the fund is a fund that invests in other investment funds; in other words, in accordance with its investment policy it may invest more than 80 percent of its assets in investment fund shares or securities issued by other collective investment instruments. However, the fund's portfolio will not contain shares of any single investment fund in a weight of over 20%, except AEGON Money Market Fund, AEGON Domestic Bond Fund, AEGON MoneyMaxx Express Fund, AEGON Alfa Derivative Fund, AEGON Central European Credit Fund and AEGON Ózon Capital Protected Fund.

Aegon Ozon Capital Protected Fund	2.5%
Aegon EuroExpress Fund	0.0%
Total:	100%

MARKET SUMMARY:

Equity markets fluctuated throughout April closing the month practically flat. The rally started in February lost some steam in mid-April on mixed macro news flow and profit taking. The US earnings season delivered mixed results with revenues trailing behind the consensus, while bottomline data once again surpassed analyst expectations. The USD was under pressure as the FED once again postponed its rate hike. Commodities, on the other hand, were supported by the weakening USD, particularly precious metals surging to multi-year highs. Regardless of the unsuccessful Doha meeting on production freeze, oil prices kept rallying for the most part of the month.

We made the quarterly revision of the fund at the end of March. Based on short and long term risk weighted returns we rose MoneyMaxx weight in the portfolio.
