Net Asset Value of HUF series:	33,383,276,192 HUF
Net Asset Value per unit:	4.997763 HUF

INVESTMENT POLICY OF THE FUND:

The fund is intended to serve as a stable, moderately low-risk form of investment, and to offer investors higher returns than bank deposits over the medium term. The portfolio elements are selected in accordance with the above principles. To ensure liquidity, the fund primarily aims to hold bonds and discount treasury bills issued by the State Debt Management Centre on behalf of the State of Hungary, as well as bonds issued by the National Bank of Hungary. The fund has a low risk profile, but its portfolio may also contain forint-denominated debt securities issued by banks and corporations, which are expected to yield a higher return than government securities. The fund may also keep its liquid assets in bank deposits. Besides this, the fund may hold a limited proportion of foreign-currency instruments in its portfolio, but only subject to the full hedging of currency risk. Aegon Domestic Bond Fund must hold minimum 80% of its assets in HUF-denominated bonds issued by the members of European Economic Area.

Risk and Reward Profile:

MARKET SUMMARY:

The market repriced significantly in April after the turnaround in central bank communication and the weakening trend continued in May as well with yields rising 15-20 bps in the month. Investors got confused about the expected path of monetary policy, even the Fitch upgrade to investment grade did not help improve sentiment. Although foreign investor positioning is significantly lighter and absolute and relative valuation of local bonds improved, sentiment is yet to turn supportive which may remain unchanged until the British EU-vote.

ASSET ALLOCATION OF THE FUND ON 05/31/2016
