Total Net Asset Value of the whole Fund:	5,836,981,766 HUF
Net Asset Value of PI series:	127,035 PLN
Net Asset Value per unit:	1.174538 PLN

## INVESTMENT POLICY OF THE FUND:

The fund aims to share in the yields of the Turkish equity market, and to profit from Turkey's economic growth through share price gains and dividend income. Given the risk profiles of the equity investments, the fund is classified as a high-risk investment. The fund manager's intentions are that the fund's portfolio should consist predominantly of the publicly traded shares of foreign-domiciled companies. The primary investment targets are the stock exchange-traded shares of companies that maintain an active presence in Turkey, or that generate a substantial proportion of their revenues in the Turkish market. When building the fund's portfolio, beyond the minimum statutory requirements, the principles of safety and maximum diversification (the spreading of risk) are observed. The fund management company, exercising all due care, determines the means of utilising the fund's resources on the basis of its own judgement and decisions, while observing the relevant legal provisions and the limitations stipulated in the Fund Documentation and by taking into account the macroeconomic environment of the investment markets, relying primarily on fundamental analysis. When compiling the portfolio, it is shares that determine the nature of the fund, and thus the proportion of shares that may be held in the fund at any given moment may reach the prevailing statutory maximum. When determining the weights, within the equity investments, of shares traded in the Turkish market, we aim to ensure that the fund - in line with our expectations with regard to future risks and yields - achieves its objective, which is to outperform the benchmark advertised by the fund, over the longer term. The fund records its assets in forint; the fund management company may, at its own discretion, choose to hedge all or a part of its currency risks with forward currency positions, in compliance with the applicable statutory requirements. Under the current legislation the proportion of shares in the portfolio may be up to 100%.

## RISK INDICATORS FOR THE LAST 12 MONTHS:

Annualized standard deviation of the fund's weekly yields: 31.99 %  
Annualized standard deviation of the benchmark's weekly yields: 32.86 %

## MARKET SUMMARY:

Just like in April, equities started the month on a weak footing in May, but due to a strong rebound in the last days of the month most major indices managed to close the month in green. There were, however, some exceptions, such as Turkey, Poland or Russia, which did not manage to turn the early trend, but most equity markets had a fair month in May. It is interesting though, that bond markets did not validate the equity market's optimism with US and German long rates staying at depressed levels. Oil reached 50 dollar per barrel, but the momentum stalled there without further advance. May was also a surprisingly strong month for the dollar and the yen. Copper, however, closed the month at the bottom of its recent ranges. Turkish equity market underperformed substantially MSCI Emerging Market Index on recurring political risk in May. The fund performed well compared to its benchmark due to its more defensive portfolio structure.

## ASSET ALLOCATION OF THE FUND ON 05/31/2016
