MARKET SUMMARY:

Just like in May, equities started the month on a weak footing in May, but due to a strong rebound in the last days of the month most major indices managed to close the month in green. There were, however, some exceptions, such as Turkey, Poland or Russia, which did not manage to turn the early trend, but most equity markets had a fair month in May. It is interesting though, that bond markets did not validate the equity market's optimism with US and German long rates staying at depressed levels. Oil reached 50 dollar per barrel, but the momentum stalled there without further advance. May was also a surprisingly strong month for the dollar and the yen. Copper, however, closed the month at the bottom of its recent ranges. The fund opened shorts at the beginning of the month, but, as opposed to previous month, it did not stop its positions at the market rebound. It is still short in equities and long in USD and JPY against AUD and HUF.
