Total Net Asset Value of the whole Fund:	2,023,168,190 HUF
Net Asset Value of EUR series:	100,308 EUR
Net Asset Value per unit:	1.093528 EUR

INVESTMENT POLICY OF THE FUND:

The fund aims to share in the yields on equity markets in the Asian region, and to profit from the region's economic growth through share price gains and dividend income. Given the risk profiles of the equity investments, the fund is classified as a high-risk investment. The fund invests its capital in equity-type instruments of the target countries. The fund aims to create an opportunity for investors to invest in equity markets that are representative of the Asian economies. The most important target countries are Hong Kong, India, China, South Korea and Taiwan, but the fund also invests in the capital markets of other Asian countries. This may be achieved through the purchase of individual shares or through collective investment instruments. The fund plans to invest predominantly in the latter, and accordingly, it primarily buys into exchange-traded funds (ETFs) and open-ended public investment funds. In accordance with our obligation under law, we draw the attention of all investors to the fact that the fund is a fund that invests in other investment funds; in other words, in accordance with its investment policy it may invest more than 80 percent of its assets in investment fund shares or securities issued by other collective investment instruments. However, the fund's portfolio will not contain shares of any single investment fund in a weight of over 20%. The fund only invests in investment vehicles whose expense ratio is less than 2.5%, though it always strives to ensure that the overall average fee burden does not exceed 1%.

Annualized standard deviation of the fund's weekly yields:	25.65 %
Annualized standard deviation of the benchmark's weekly yields:	23.27 %

MARKET SUMMARY:

High volatility characterized the equity market in June due to the fact that the British referendum triggered uncertainty in the market. After the win of the Leave campaign, major indices collapsed without exception. However in the end of the month indices rebounded a bit from the lows but were not able to close in the black. Oil soared in the beginning of the month, although OPEC negotiations were unsuccessful, mainly because of the supply problems and rise of the demand. However oil lost its momentum in the second half of the month due to Brexit effects on dollar and risk aversion. For this reason oil close the month particularly flat. FED postponed its rate hike again as fears over weaker labour market information and Brexit. As a result of increasing uncertainty, both precious and industrial metals price skyrocketed. Asian equity markets closed a strong month in HUF terms, only the Japanese equity markets closed the month in the red. Against expectations BoJ left the monetary policy unchanged which caused massive strengthening of the Japanese currency. Investors bought yen massively also on worsening sentiment.

ASSET ALLOCATION OF THE FUND ON 06/30/2016

Asset type	Weight
Collective securities	95.02 %
Current account	5.64 %
