 Net Asset Value of HUF series: 4,887,108,932 HUF
 Net Asset Value per unit: 4.105944 HUF

INVESTMENT POLICY OF THE FUND:

The objective of the fund is to invest in Central and Eastern European equities. The fund is offered for investors who would like to benefit from the long term performance of regional listed companies. The average equity exposure of the fund is 95%. A primary consideration when compiling the fund's portfolio is the need to optimize the aggregate risk of the securities to be included in the fund. In the interest of reducing the risk, the utmost care is taken when selecting the securities to include in the fund's portfolio. The fund buys shares issued by corporations from countries in the Central European region (primarily Hungary, Poland, the Czech Republic, Romania, Slovenia and Croatia, and secondarily, Austria, Russia and Turkey), but it may also invest in the shares of companies in other emerging and developed countries, as well as in other collective investment securities. The fund may hedge a part or all of its currency risks with forward currency positions. To ensure liquidity the fund aims to hold in its portfolio the government securities on behalf of the State of Hungary and bonds issued by the National Bank of Hungary, but in accordance with the statutory regulations the proportion of shares in the portfolio may be up to 100%.

Risk and Reward Profile:

MARKET SUMMARY:

High volatility characterized the equity market in June due to the fact that the British referendum triggered uncertainty in the market. After the win of the Leave campaign, major indices collapsed without exception. However in the end of the month indices rebounded a bit from the lows but were not able to close in the black. Oil soared in the beginning of the month, although OPEC negotiations were unsuccessful, mainly because of the supply problems and rise of the demand. However oil lost its momentum in the second half of the month due to Brexit effects on dollar and risk aversion. For this reason oil close the month particularly flat. FED postponed its rate hike again as fears over weaker labour market information and Brexit. As a result of increasing uncertainty, both precious and industrial metals price skyrocketed. CEE equity market underperformed MSCI Emerging Market Index again as except for the Romanian equity market all regional equity markets fell in June. Romanian overweight and Polish underweight contributed to the fund's performance positively.

ASSET ALLOCATION OF THE FUND ON 06/30/2016
