Total Net Asset Value of the whole Fund:	1,054,326 EUR
Net Asset Value of EUR series:	1,054,326 EUR
Net Asset Value per unit:	1.000295 EUR

INVESTMENT POLICY OF THE FUND:

The fund aims to grow the euro-based savings invested in it through returns that exceed the interest rates attainable on bank deposits. The fund is a money-market fund with a broad investment policy, issued in euro, which combines the fund management company's emerging-markets expertise with the safety of classic money-market funds. The fund may invest in the investment instruments permitted by law, with special regard to the money and bond markets. The fund may not hold shares. The fund's investment focus is on short-term government and corporate euro bonds. In the interest of achieving a stable traded price and low volatility we keep the fund's interest risk low; the fund's average modified duration may not exceed one year. Besides traditional money-market instruments (treasury bills, government securities), the fund aims to ensure a higher yield than that of traditional money-market instruments by purchasing mortgage and corporate bonds, and by taking advantage of the premiums that these offer. When selecting these instruments the fund sets strict quality requirements, and may not hold securities that are below investment-grade or do not have a credit rating, except for bonds issued or guaranteed by the State of Hungary. The fund can only open long positions, and is not permitted to open uncovered short positions. It may only open forward contracts for the purposes of hedging or portfolio optimisation. The fund may not use leverage. The fund aims to choose as freely as possible among the opportunities available in the domestic and international capital markets, exercising the caution that is consistent with the fund's investment strategy. The fund records its assets in euro, and endeavours to fully hedge its exposures in other currencies.

Annualized standard deviation of the fund's weekly yields: 0.07 %
Annualized standard deviation of the benchmark's weekly yields: 0.01 %

MARKET SUMMARY:

For the most part markets in July bounced back from the initial post-Brexit fallout. Much of the general rebound elsewhere can be attributed to the renewed hopes of central bank policy remaining accommodative. In the case of the BoE and ECB, expectations were high for further easing despite remaining on the sidelines in July and instead waiting for the post-Brexit data. Markets were also waiting for Shinzo Abe to introduce the newest leg of fiscal stimulus in the context of Japan's ongoing three arrow structural reform. The main laggard asset was energy in July as WTI has slide 15% which took it levels near 40 USD, while Brent went on a same path with a 13% slide. Hard currency emerging market sovereign bonds weathered the slide of oil and relatively stronger USD quite well as the asset class posted a 1,92% performance from the asset class in USD in July. The asset class saw some record inflows into both hard currency and local currency. Strong sentiment persisted around EM bonds throughout the month.

ASSET ALLOCATION OF THE FUND ON 07/31/2016
