Total Net Asset Value of the whole Fund:	8,689,045 PLN
Net Asset Value of PLN series:	8,689,045 PLN
Net Asset Value per unit:	0.010143 PLN

INVESTMENT POLICY OF THE FUND:

The aim of the fund is to provide an alternative solution for those investors who are expecting a decline of the share prices on the Polish Stock Market. In case of declining share prices by its WIG20 short future exposure the fund ensures that the investor will get extra return on his investment. If the fund manager expects that the stock markets will go up than he reduces the option position, but if he sees higher risk in the stock markets than he will buy more put options for the WIG20 Index. Since the capital protection allows the fund manager to buy only limited amount of futures the maximum short exposure of the fund is 100% of the fund's net asset value. Since the fund is a dedicated bearish fund it intends to keep the WIG20 short exposure 20%-40% of net asset value, depends on the strategy of the Fund Manager. To protect the capital, the Fund mainly invests in Polish treasury bills, government bonds and other debt securities. The Fund offers 90% capital protection for the first trading day of the year under special condition. The 90% capital protection is ensured by the investment policy of the Fund, it does not mean a full capital protection.

MARKET SUMMARY:

The last month of summer was pretty eventless. Equity markets continued their strong performance in August combined with extreme low market volatility. US equity indices pushed to new all-time highs again. For this reason and because of the improving macroeconomic data, FED central bankers suggested that the question of tighter monetary policy became more relevant to US economy. As a result, the probability of this year FED rate hike increased to the highest level in the summer. Investors already pay attention to events in September when central banks will make decisions about the direction of their monetary policy. This month was a good one for oil as closing short positions and news about the future OPEC meeting in September had favorable effects on its price. The main topic of the OPEC negotiation will be about a possible oil production freeze again.

Polish equity index surged similarly to Emerging markets. Top performing industries were the banking and the commodity sector in August. The reason behind the improving banking stocks is the more market-friendly proposal for the CHF mortgage bill.
