### INVESTMENT POLICY OF THE FUND:

The fund's aim is to earn capital gains by taking positions in a wide range of assets while keeping risk under pre-defined limits. The assets are selected based on fundamental and technical criteria from the widest range of industry and country exposures possible. Based on medium and long-term trends, the fund can buy or sell equities, bonds and other securities, and take various exposures using exchange (futures, options) and OTC derivatives (IRS and currency forwards). Naked shorts on securities are not allowed. The manager selects and builds positions based on fundamental and technical analysis in such a way, that the fund's return can exceed that of bank deposits over a medium-term horizon. Equally important focus is given to risk management which targets Level 5 risk bracket. The fund is not targeting any specific sectors, countries or asset classes, but most of its exposures will be taken on US and European exchanges, or markets regulated by the capital market authorities of the United States of America and the countries of the European Union. The fund's net corrected risk exposure may go up to 200 percent of the portfolio, in accordance with the Hungarian capital market acts and regulations. The fund can also run a net short exposure, also in accordance with the above mentioned regulatory limits.

### MARKET SUMMARY:

The last month of summer was pretty eventless. Equity markets continued their strong performance in August combined with extreme low market volatility. US equity indices pushed to new all-time highs again. For this reason and because of the improving macroeconomic data, FED central bankers suggested that the question of tighter monetary policy became more relevant to US economy. As a result, the probability of this year FED rate hike increased to the highest level in the summer. Investors already pay attention to events in September when central banks will make decisions about the direction of their monetary policy. This month was a good one for oil as closing short positions and news about the future OPEC meeting in September had favorable effects on its price. The main topic of the OPEC negotiation will be about a possible oil production freeze again. Long JPY and short GBP positions were closed in August, while small amount of equity index short was opened in fund with tight stop.
