Net Asset Value of HUF series:	7,360,250,261 HUF
Net Asset Value per unit:	1.450484 HUF

INVESTMENT POLICY OF THE FUND:

The aim of the fund is to create for its investors an investment portfolio that generates a positive yield under all circumstances; in other words, it takes a 'total return' approach. It does this by using various analysis techniques to select the asset classes and investment funds that have the greatest potential to appreciate in value, and by investing in the shares of investment funds and in collective investment securities. The fund primarily invests its capital in the funds managed by Aegon Hungary Investment Fund Management, but it may also purchase other investment funds and collective investment securities for its portfolio for the purpose of diversification, if the given asset class is not yet covered by the fund management company's own funds. Indirectly, the fund is capable of accessing the entire known investment universe of today through the purchase of investment fund shares (in bond markets, money markets, equity markets, property market, private equity, derivatives and other regulated and OTC derivative products, commodity-market products, currencies etc.), and of making its investments both at domestic and international level. To ensure liquidity, the fund may hold discount treasury bills and government bonds issued by the State Debt Management Centre (ÁKK), interest-bearing securities guaranteed by the State of Hungary, and bonds issued by the National Bank of Hungary. In order to achieve a positive yield, the fund makes active use of risk management procedures and carefully selects the position size of its riskier investments. Since the range of investments includes foreign currency-denominated investments, ETFs and investment fund shares, investors in the fund are also exposed to currency risk. In accordance with our obligation under law, we draw the attention of all investors to the fact that the fund is a fund that invests in other investment funds; in other words, in accordance with its investment policy it may invest more than 80 percent of its assets in investment fund shares or securities issued by other collective investment instruments. However, the fund's portfolio will not contain shares of any single investment fund in a weight of over 20%, except AEGON Money Market Fund, AEGON Domestic Bond Fund, AEGON MoneyMaxx Express Fund, AEGON Alfa Derivative Fund, AEGON Central European Credit Fund and AEGON Ózon Capital Protected Fund.

Total:	100%

MARKET SUMMARY:

Main equity indices finished close to their previous month values in September as after a strong start equity markets' mood deteriorated. Central banks were mainly in focus during the month. Markets were not delighted with the announcement of ECB not extending its QE program. Investors expected further monetary easing from the central bank. Although decisions of FED and BoJ boosted market prices. FED acted in line with market expectations and postponed its rate hike in September, while BoJ announced that it holds its current accommodative monetary policy and introduced yield-targeting measures. US elections heated up with the first presidential debate, where according to the market Hillary Clinton performed well, therefore investors started to buy stocks. US Department of Justice wants Deutsche Bank to pay several billion dollars fine in connection with probe tied to mortgage-backed securities. For this reason its stocks were punished heavily, making banks the worst performing sector during the month. Oil had a great month in September as OPEC members surprisingly agreed to cut oil production. As a result oil prices approached \$50 level again.
