Total Net Asset Value of the whole Fund:	4,338,676,778 HUF
Net Asset Value of institutional series:	912,730,242 HUF
Net Asset Value per unit:	2.101783 HUF

INVESTMENT POLICY OF THE FUND:

The fund aims to share in the yields of the Turkish equity market, and to profit from Turkey's economic growth through share price gains and dividend income. Given the risk profiles of the equity investments, the fund is classified as a high-risk investment. The fund manager's intentions are that the fund's portfolio should consist predominantly of the publicly traded shares of foreign-domiciled companies. The primary investment targets are the stock exchange-traded shares of companies that maintain an active presence in Turkey, or that generate a substantial proportion of their revenues in the Turkish market. When building the fund's portfolio, beyond the minimum statutory requirements, the principles of safety and maximum diversification (the spreading of risk) are observed. The fund management company, exercising all due care, determines the means of utilising the fund's resources on the basis of its own judgement and decisions, while observing the relevant legal provisions and the limitations stipulated in the Fund Documentation and by taking into account the macroeconomic environment of the investment markets, relying primarily on fundamental analysis. When compiling the portfolio, it is shares that determine the nature of the fund, and thus the proportion of shares that may be held in the fund at any given moment may reach the prevailing statutory maximum. When determining the weights, within the equity investments, of shares traded in the Turkish market, we aim to ensure that the fund - in line with our expectations with regard to future risks and yields - achieves its objective, which is to outperform the benchmark advertised by the fund, over the longer term. The fund records its assets in forint; the fund management company may, at its own discretion, choose to hedge all or a part of its currency risks with forward currency positions, in compliance with the applicable statutory requirements. Under the current legislation the proportion of shares in the portfolio may be up to 100%.

Risk and Reward Profile:

MARKET SUMMARY:

Equities did not close strongly in October as except for the Japanese market, main equity indices lost from their value. The increasing fear of FED rate hike and the risk aversion caused by the US presidential election did not support equities. The banking sector was the best performing industry in October as a result of rising interest rates and better-than-expected corporate earnings. The probability of FED rate hike in December escalated during the month and because of that USD was strong compared to major currencies in October. European Central Bank postponed its decision about the future of its QE program due to the fact that decision makers want to wait for the result of FED meeting in December. GBP was punished during the month since it seems like British government pursues a "hard Brexit", which means that Britons will not only leave EU, but also EU's single market in exchange for regaining better control of their immigration policy. Investors started to accommodate themselves to US presidential election at the end of the month by decreasing their risky assets. According to polls, Hillary Clinton has better chances to win the election, which would be a more pleasant outcome for equity markets. After starting strong, oil prices fell from their one-year highs thanks to OPEC, which backed out from its oil freezing agreement, and the strong USD. As a result, oil ended up in the negative territory in October.

Although Turkish equity markets underperformed MSCI Emerging Market Index, Turkish equities still finished in the black in October. In terms of valuation Turkish market is still attractive, however because of the deteriorating dynamics of corporate earnings and macro picture, Turkish assets were still underweight and defensive positions were opened during the month.

ASSET ALLOCATION OF THE FUND ON 10/31/2016
