Total Net Asset Value of the whole Fund:	42,956,050,183 HUF
Net Asset Value of USD series:	627,278 USD
Net Asset Value per unit:	1.018632 USD

INVESTMENT POLICY OF THE FUND:

The fund's aim is to assemble an investment portfolio for its investors that is comprised of both Hungarian and international money and capital-market instruments, which the fund can optimise through ongoing dynamic asset allocation in order to attain the highest possible yield. The fund is a 'total-return fund', which means that instead of concentrating on just one subsector of the money or capital market, at any given moment it focuses its investments on the area that holds the promise of the highest possible return. Accordingly, the fund may hold government securities and discount treasury bills issued by the State Debt Management Centre (ÁKK) on behalf of the State of Hungary, as well as bonds issued by the National Bank of Hungary, and also bank and corporate bonds that are low risk but are nevertheless likely to earn a higher return than government securities. Besides these the fund's portfolio may also contain shares listed on the domestic stock exchange and the bourses of OECD countries, as well as the government securities, bank and corporate bonds of OECD countries. The fund does not follow a fixed benchmark, and does not adhere to a permanent ratio of shares to bonds, but aims to constantly change this ratio within a broad range; indeed, it is also prepared to take on currency risk (just as international bond/equity funds tend to) through the purchase of international government securities and equities. At the same time, the fund maintains the option to hedge currency risks.

very low	low	moderate	intermediate	significant	high	very high

MARKET SUMMARY:

Strong European macro data and sufficiently good US data for a December rate hike drove core market long bond yields higher by 20-25 bps during the month. The USD also appreciated from the middle of the month while oil prices turned lower either which did not bode well for most of our EM exposures. Spreads, however, did not rise significantly and equities did not experience large selling pressure, thus we did not change our equity allocation. We increased our local bond exposure on the short end amid renewed liquidity expanding measures from the central bank and our HUF long position was reduced.

ASSET ALLOCATION OF THE FUND ON 10/31/2016
