Total Net Asset Value of the whole Fund:	1,049,534 EUR
Net Asset Value of EUR series:	1,049,534 EUR
Net Asset Value per unit:	0.999889 EUR

INVESTMENT POLICY OF THE FUND:

The fund aims to grow the euro-based savings invested in it through returns that exceed the interest rates attainable on bank deposits. The fund is a money-market fund with a broad investment policy, issued in euro, which combines the fund management company's emerging-markets expertise with the safety of classic money-market funds. The fund may invest in the investment instruments permitted by law, with special regard to the money and bond markets. The fund may not hold shares. The fund's investment focus is on short-term government and corporate euro bonds. In the interest of achieving a stable traded price and low volatility we keep the fund's interest risk low; the fund's average modified duration may not exceed one year. Besides traditional money-market instruments (treasury bills, government securities), the fund aims to ensure a higher yield than that of traditional money-market instruments by purchasing mortgage and corporate bonds, and by taking advantage of the premiums that these offer. When selecting these instruments the fund sets strict quality requirements, and may not hold securities that are below investment-grade or do not have a credit rating, except for bonds issued or guaranteed by the State of Hungary. The fund can only open long positions, and is not permitted to open uncovered short positions. It may only open forward contracts for the purposes of hedging or portfolio optimisation. The fund may not use leverage. The fund aims to choose as freely as possible among the opportunities available in the domestic and international capital markets, exercising the caution that is consistent with the fund's investment strategy. The fund records its assets in euro, and endeavours to fully hedge its exposures in other currencies.

2009	10.85 %	2.53 %
2008	-16.05 %	4.11 %

MARKET SUMMARY:

The US election result sparked a huge divergence across asset classes and also between developed and emerging markets. One of the memorable moves last month was the significant repricing across global yield curves with yields spiking higher on the prospect of fiscal stimulus under President-elect Trump. Indeed global developed yields increased to a large extent and closed the month with a spike ranging from 10 to 50 basispoints. The increasing volatility and yield-rise coupled with the deteriorating prospect for EM countries obviously took its toll on the performance of EM bonds. The sudden turnaround in flows kicked the can down further with an outflow reaching more than USD 6 billion of which hard currency accounted for nearly USD 3,5 billion. The EM USD sovereign spreads widened from their yearly highs of 360 to 390 basispoints by the month end with Latin America underperforming as the most effected region to the potentially new US policies.

ASSET ALLOCATION OF THE FUND ON 11/30/2016
