INVESTMENT POLICY OF THE FUND:

The aim of the investment fund is to give investors access to the Polish bond market and to function as a relatively stable, medium-risk investment already medium term, offering our customers stable real returns without the need to tie up their savings for a fixed period. The fund primarily invests into Zloty denominated Polish government bonds but the portfolio manager has some room to use other fixed income investments. We aim to maximise returns with the given risk level. Our investment decisions are based on fundamental research extended by technical research while we also take into account global market sentiment. Expected shifts in the yield curve based on our macro expectations are at the core of our investment process. Risk/return characteristics are also considered when we select suitable and safe investments. We aim to totally hedge any currency risk in the fund.

MARKET SUMMARY:

The US election result sparked a huge divergence across asset classes and also between developed and emerging markets. One of the memorable moves last month was the significant repricing across global yield curves with yields spiking higher on the prospect of fiscal stimulus under President-elect Trump. Indeed global developed yields increased to a large extent and closed the month with a spike ranging from 10 to 50 basispoints. The increasing volatility and yield-rise coupled with the deteriorating prospect for EM countries obviously taking its toll on the performance of EM bonds. The sudden turnaround in flows kicked the can down further with an outflow reaching more than USD 6 billion of which hard currency accounted for nearly USD 3,5 billion. As armageddon came through bond markets across the world POLGBs were not spared. Bond curve steepened massively as short end was relatively shielded by weak Q3 Polish GDP print and banking tax related demand. Spread between PS0721 and DS0726 moved to record level (almost 90 bps). During the month the Polish Parliament voted for the retirement age cut, that put further pressure on the long dated bonds, however local newsflow played little part in December, price action was driven by global developments (US elections). We had some duration underweight in our fund and we were positioned for a steepening of the yield curve, so we benefitted from the sell-off slightly.
