| Total Net Asset Value of the whole Fund: | 2,570,188,043 HUF |
| Net Asset Value of HUF series: | 123,619,929 HUF |
| Net Asset Value per unit: | 1.466486 HUF |

INVESTMENT POLICY OF THE FUND:

The aim of the investment fund is to give investors access to the Polish bond market and to function as a relatively stable, medium-risk investment already medium term, offering our customers stable real returns without the need to tie up their savings for a fixed period. The fund primarily invests into Zloty denominated Polish government bonds but the portfolio manager has some room to use other fixed income investments. We aim to maximise returns with the given risk level. Our investment decisions are based on fundamental research extended by technical research while we also take into account global market sentiment. Expected shifts in the yield curve based on our macro expectations are at the core of our investment process. Risk/return characteristics are also considered when we select suitable and safe investments. We aim to totally hedge any currency risk in the fund.

Risk and Reward Profile:

MARKET SUMMARY:

In January Polish bond yields increased gradually on the back of firming macro data in Europe, some tapering expectations and sell-off in periphery yields. Local macro data was not helping either with PMI, retail sales, industrial output, inflation numbers pointing toward an increase in economic momentum. During the next two quarters inflation will be boosted by statistical base effects, PLN and commodity price spike (CPI to reach around 2% in H1).

The MPC kept rates on hold during its January meeting. During the press conference, the NBP governor interpreted the risks for inflation as balanced and symmetrical. Recent uptick in inflation is treated as exogenous. Governor Glapinski reiterated his view that, by holding nominal rates constant in the face of higher inflation, the NBP will allow real rates to drift below zero and stimulate the economy. With increasing inflation and economic activity, MPC proved to be less hawkish than previously, however higher headline inflation may demand higher nominal yields.

The new auction system went well, issuance was smooth, it will be more difficult to buy cheap bonds on auctions after the changes. The Ministry of Finance reached the level of ca. 35% of the borrowing requirements after the first 2 auctions in January, however prefinancing was 26%.

Altogether polish bond yields increased by 15-25 bps during January.

ASSET ALLOCATION OF THE FUND ON 01/31/2017

| Asset type | Weight |
