Net Asset Value of R series:	3,402,599,200 HUF
Net Asset Value per unit:	1.180717 HUF

INVESTMENT POLICY OF THE FUND:

The fund's aim is to assemble an investment portfolio for its investors that is comprised of both Hungarian and international money and capital-market instruments, which the fund can optimise through ongoing dynamic asset allocation in order to attain the highest possible yield. The fund is a 'total-return fund', which means that instead of concentrating on just one subsector of the money or capital market, at any given moment it focuses its investments on the area that holds the promise of the highest possible return. Accordingly, the fund may hold government securities and discount treasury bills issued by the State Debt Management Centre (ÁKK) on behalf of the State of Hungary, as well as bonds issued by the National Bank of Hungary, and also bank and corporate bonds that are low risk but are nevertheless likely to earn a higher return than government securities. Besides these the fund's portfolio may also contain shares listed on the domestic stock exchange and the bourses of OECD countries, as well as the government securities, bank and corporate bonds of OECD countries. The fund does not follow a fixed benchmark, and does not adhere to a permanent ratio of shares to bonds, but aims to constantly change this ratio within a broad range; indeed, it is also prepared to take on currency risk (just as international bond/equity funds tend to) through the purchase of international government securities and equities. At the same time, the fund maintains the option to hedge currency risks.

RISK INDICATORS FOR THE LAST 12 MONTHS:

Annualized standard deviation of the fund's weekly yields: 1.35 %
Annualized standard deviation of the benchmark's weekly yields: 0.28 %

MARKET SUMMARY:

Macro data remained strong in US and Europe as economic recovery broadened. Despite the strong data some of the "Trump trades" suffered: core yields stabilised and the dollar depreciated against most currencies. Equity markets remained strong with the S&P 500 touching the 2300 level and supported by good company reports. We hedged some of our equity exposure as we expect some disappointment after the new US president's inauguration with investor focus turning from hope to actual measures. We continue to keep low duration and selectively take positions in bond markets, like Polish government bonds unhedged.

ASSET ALLOCATION OF THE FUND ON 01/31/2017
