Currency:	EUR
Total Net Asset Value of the whole Fund:	5,563,180 EUR
Net Asset Value of EUR series:	1,909,008 EUR
Net Asset Value per unit:	0.009517 EUR

INVESTMENT POLICY OF THE FUND:

The aim of the fund is to profit from the return on climate change-related equity market investments, through share price gains and dividend income. Given the risk profiles of the equity investments, the fund is classified as a high-risk investment. The fund manager's intentions are that the fund's portfolio should consist predominantly of the publicly traded shares of foreign-domiciled companies. The primary investment targets are the securities of companies that earn most of their revenues from exploiting the business opportunities arising from global climate change (environmental management, energy efficiency, clean technologies etc.), harnessing alternative resources (renewable energy, water management, agricultural chemistry etc.) and from agricultural activity (biotechnology, animal husbandry, fish farming, agricultural technology, etc.). When building the fund's portfolio, beyond the minimum statutory requirements, the principles of safety and maximum diversification (the spreading of risk) are observed. Accordingly, the fund primarily buys publicly issued foreign equities that are listed on foreign stock exchanges, and secondarily, it may also invest in shares issued by Hungarian companies. In order to achieve its aim, the fund can hold collective investment vehicles and ETFs in its portfolio. The fund management company, exercising all due care, determines the means of utilising the fund's resources on the basis of its own judgement and decisions, while observing the relevant legal provisions and the limitations stipulated in the Fund Documentation and by taking into account the macroeconomic environment of the investment markets, relying primarily on fundamental analysis. When compiling the portfolio, it is shares that determine the nature of the fund, and thus the proportion of shares that may be held in the fund at any given moment may reach the prevailing statutory maximum. The proportions, within the equity investments, of subsectors related to climate change, alternative energy sources and agricultural activity are determined so as to ensure that the fund - in line with our expectations with regard to future risks and yields - fulfils its objective, which is to outperform the thematic global sector index selected as the benchmark over the longer term. The fund records its assets in euro; the fund management company may, at its own discretion, choose to hedge all or a part of its currency risks with forward currency positions, in compliance with the applicable statutory requirements.

Risk and Reward Profile:

MARKET SUMMARY:

Main equity indices performed well in February thanks to the improving macro environment. US equities were supported by the US government's promised tax reform, the inflow of money and the better-than-expected earnings. European stocks were also positively affected by European companies' favorable profit trends. However, the market closely watches risks in Europe. Because of the approaching European elections, investors paid more attention to the strengthening populist parties. Le Pen's support in France has increased in the last surveys, while in the Netherlands the Party for Freedom currently leads the polls. Besides, Greek debt problems are back again. EU and IMF were unable to agree on the necessary Greek reforms as EU officials claimed that IMF is too pessimistic about the path of Greek debt. For these reasons, investors preferred defensive sectors (healthcare and consumer staples stocks) to cyclical. Dollar strengthened in February since more and more central bankers emphasized the need for rate hike in light of the stable economic growth and rising inflation. As a result of European political uncertainties many investors bought safe have assets like gold and silver, which prices soared during the month.

Climate change-related stocks performed well in February. Apart from the agriculture sector, all industries were able to finish above their last month closing price.

ASSET ALLOCATION OF THE FUND ON 02/28/2017
