Currency:	USD
Total Net Asset Value of the whole Fund:	9,243,329 EUR
Net Asset Value of USD series:	101,380 USD
Net Asset Value per unit:	1.013804 USD

INVESTMENT POLICY OF THE FUND:

The fund's investment objective is to provide investors with capital appreciation by investing in the sovereign- and quasi-sovereign bond market of Emerging European countries. The fund has no rating constraints, the fund has a permission to invest in any kind of issuer without limitation on its long-term foreign currency debt rating. The fund aims to reach the highest capital gain with rational risk taking. The fund primarily invests on the sovereign- and quasi-sovereign bond market of Emerging European countries denominated in foreign currency, but holds Hungarian local currency, long- and short-term bonds with diversification and liquidity management purposes. The fund may also invest in mortgage backed securities, and short- and long-term, fixed or floating securities of other financial institutions, municipalities or other business corporations, structured and convertible bonds. The fund's general risk level and the measure of the deviation from the target weights are determined on the basis of a regular market analysis and situational analysis relating to four main aspects (fundamentals, valuation levels, market sentiment, technical factors). The core part of the fund consists of the foreign currency denominated, sovereign and quasi-sovereign bonds of Central and Eastern Europe (Hungary, Croatia, Poland, Romania, Slovakia, Ukraine), Southeast Europe (Serbia, Turkey), Baltic states (Lithuania, Latvia) and the countries of the Commonwealth of Independent States (Azerbaijan, Belarus, Kazakhstan, Russia, Georgia, Armenia) and also holds Hungarian local currency bonds with diversification and liquidity management purposes. In case of attractive market conditions (e.g. possible upgrade of an issuer's long-term foreign currency debt rating, change of the yield curve, market mispricing, etc.) the fund may invest in bonds of issuers not listed above. The fund does not intend to invest more than 25% of its assets in a single country. The target weight for the fund's fixed income investments in the above listed countries (target countries) is 95%. The aimed risk profile of the fund is intermediate. We do not use constraints on foreign currency debt ratings. The fund may only conclude derivative transactions for the purpose of hedging or ensuring an efficient portfolio structure. The fund may also hold unleveraged debt-type collective investments linked to derivative indexes. The fund also has the option of taking on a substantial currency exposure, which will ordinarily be fully hedged to the target currency (USD), although depending on market circumstances the fund may even have an open currency position.

MARKET SUMMARY:

While political developments and particularly those related to the Trump presidency have continued to drive the performance and sentiment of assets to some degree, global economic data continues to hold up well which in turn is helping to support a positive backdrop for most risk assets. In addition, the incredibly low level of volatility throughout markets has remained a major theme throughout the month. In this environment emerging markets also showed signs of improvement in macro data with global trade indicators picking up and industrial production also looking healthier for EM. Only headwind was caused by the 10% drop in the price of oil, but most oil exporting EM countries have managed to pull through this period with a relatively benign increase in bond yield spreads. Inflows persisted in the month left behind as the performance of the asset class reached a decent return. We increased our position in Russia and also in Ukraine. Bought some Kazakhstan bonds as well.

ASSET ALLOCATION OF THE FUND ON 03/31/2017
