Currency:	PLN
Total Net Asset Value of the whole Fund:	194,057,575 PLN
Net Asset Value of institutional series:	144,344,804 PLN
Net Asset Value per unit:	1.329667 PLN

## INVESTMENT POLICY OF THE FUND:

The fund aims to share in the yields of the Polish equity market, and to profit from Poland's economic growth through share price gains and dividend income. Given the risk profiles of the equity investments, the fund is classified as a high-risk investment. The fund manager's intentions are that the fund's portfolio should consist predominantly of the publicly traded shares of foreign-domiciled companies. The fund's primary investment targets are the exchange-traded securities of companies that are active in Poland or that generate the bulk of their revenues there, or whose shares are listed on the Warsaw Stock Exchange. The fund may also invest in the shares of other Central and Eastern European corporations. These are listed as Austria, the Czech Republic, Hungary, Russia, Romania and Turkey, although the portfolio will always chiefly consist of the shares of companies listed on the Warsaw Stock Exchange. When building the fund's portfolio, beyond the minimum statutory requirements, the principles of safety and maximum diversification (the spreading of risk) are observed. Accordingly, only publicly issued securities listed or in the process of being listed on the stock exchange will be purchased as equity investments. The fund management company, exercising all due care, determines the means of utilising the fund's resources on the basis of its own judgement and decisions, while observing the relevant legal provisions and the limitations stipulated in the Fund Documentation and by taking into account the macroeconomic environment of the investment markets, relying primarily on fundamental analysis. When compiling the portfolio, it is shares that determine the nature of the fund, and thus the proportion of shares that may be held in the fund at any given moment may reach the prevailing statutory maximum. The weights of the shares within the portfolio are determined so as to ensure that the fund - in line with our expectations with regard to future risks and yields - achieves its objective, which is to outperform the benchmark advertised by the fund, over the longer term. The fund holds more than 30% of its assets in a currency other than the domestic currency (HUF). In accordance with the current legislation, the proportion of shares in the portfolio may be up to 100%.

## MARKET SUMMARY:

Main equity indices achieved mixed results in March. European stocks performed well during the month, US market finished around its last month closing price, while Japanese equities ended slightly in the red. In the beginning of the month US stock market increased because of strong macro data, but the withdrawal of healthcare bill eventually crushed the market mood. Investors believe that the expected fiscal stimulus package should be lower as Obamacare remains in place. Also, high equity exposure did not help the growth of US equities. Contrary to the US market, European stocks were bought thanks to the improving macro, the money inflow in the region and the weakening populist parties. European elections' season has started with the Dutch election, where PM Rutte's party achieved better than expected results, while the far-right party performed below expectations. FED raised its benchmark interest rate by 25 bps in March. However, Yellen suggested a less tight monetary policy in the future. The rate hike was already priced in before the meeting but the less hawkish tone from Yellen was unexpected, as a result USD was weaker from the second half of the month. Oil prices plunged in March as US production increased, high oil long exposures were cut back and investors started to fear of oversupply. At the end of the month prices were rebounded a bit because of plans about the extension of oil output cut. The Polish market was underperformer in the region thanks to the decreasing interest around Polish banks as there was no update about the softer CHF conversion package. Corporate reports were slightly better-than-expected in March. The refinery and the retail sectors were the top performers. The fund kept its Polish OW during the month.

## ASSET ALLOCATION OF THE FUND ON 03/31/2017

Asset type	Weight
