Total Net Asset Value of the whole Fund:	2,485,254,959 HUF
Net Asset Value of HUF series:	2,429,723,997 HUF
Net Asset Value per unit:	1.588711 HUF

## INVESTMENT POLICY OF THE FUND:

The fund aims to share in the yields on equity markets in the Asian region, and to profit from the region's economic growth through share price gains and dividend income. Given the risk profiles of the equity investments, the fund is classified as a high-risk investment. The fund invests its capital in equity-type instruments of the target countries. The fund aims to create an opportunity for investors to invest in equity markets that are representative of the Asian economies. The most important target countries are Hong Kong, India, China, South Korea and Taiwan, but the fund also invests in the capital markets of other Asian countries. This may be achieved through the purchase of individual shares or through collective investment instruments. The fund plans to invest predominantly in the latter, and accordingly, it primarily buys into exchange-traded funds (ETFs) and open-ended public investment funds. In accordance with our obligation under law, we draw the attention of all investors to the fact that the fund is a fund that invests in other investment funds; in other words, in accordance with its investment policy it may invest more than 80 percent of its assets in investment fund shares or securities issued by other collective investment instruments. However, the fund's portfolio will not contain shares of any single investment fund in a weight of over 20%. The fund only invests in investment vehicles whose expense ratio is less than 2.5%, though it always strives to ensure that the overall average fee burden does not exceed 1%.

very low	low	moderate	intermediate	significant	high	very high

## MARKET SUMMARY:

Main equity indices finished slightly above their last month closing prices in April thanks to the result of the French presidential election and the announcement of Trump's tax reform. In the beginning of April investors built defensive portfolios as several risks kept market participants in suspense. Intensifying North Korean and Syrian tensions, decaying US-Russian relationship, uncertainties around the timeline of Trump's tax plan and the precarious outcome of the French election made investors cautious. By the end of the month equity indices bounced back as US tax reform was unveiled and the result of the first round of the French election was favorable. Also, strong macro environment and better-than-expected corporate earnings supported the market increase. At the end of April Trump announced the main points of the long-awaited tax plan, which was welcomed by the market. However, many members of the Congress oppose against the plan as it is not clear how the government wants to raise revenues to avoid mounting debt. Centrist Emmanuel Macron and far-right populist Marine Le Pen advanced into the second round of the French presidential election, where polls suggest that Macron is the clear favorite. For this reason, European cyclical stocks surged in April, in which the financial sector was the top performing industry, as besides the improving economic growth, political risks also decrease in the region. British PM Theresa May called for a snap general election in Great Britain that will take place in June. As a consequence, the pound appreciated dramatically. Analysts believe that British government will have more room for manoeuvre in the Brexit negotiations. Due to the appreciation of pound, stock prices of export companies in the basic material sector have plunged, negatively affecting the whole British stock market. As a result of increasing geopolitical tensions, investors bought oil in the beginning of the month, but oil prices finished below their last month closing values because of rising US oil supplies.

Even though China suffered in April, Asian stocks improved marginally. Slowing growth and new governmental rules to fight the shadow banking industry contributed to China's underperformance. Also, strained North Korean situation did not help the growth of the region.

## ASSET ALLOCATION OF THE FUND ON 04/30/2017
