Net Asset Value of institutional series:	2,591,143,325 HUF
Net Asset Value per unit:	1.024016 HUF

INVESTMENT POLICY OF THE FUND:

The fund's investment objective is to provide investors with capital appreciation by investing in the sovereign- and quasi-sovereign bond market of Emerging European countries. The fund has no rating constraints, the fund has a permission to invest in any kind of issuer without limitation on its long-term foreign currency debt rating. The fund aims to reach the highest capital gain with rational risk taking. The fund primarily invests on the sovereign- and quasi-sovereign bond market of Emerging European countries denominated in foreign currency, but holds Hungarian local currency, long- and short-term bonds with diversification and liquidity management purposes. The fund may also invest in mortgage backed securities, and short- and long-term, fixed or floating securities of other financial institutions, municipalities or other business corporations, structured and convertible bonds. The fund's general risk level and the measure of the deviation from the target weights are determined on the basis of a regular market analysis and situational analysis relating to four main aspects (fundamentals, valuation levels, market sentiment, technical factors). The core part of the fund consists of the foreign currency denominated, sovereign and quasi-sovereign bonds of Central and Eastern Europe (Hungary, Croatia, Poland, Romania, Slovakia, Ukraine), Southeast Europe (Serbia, Turkey), Baltic states (Lithuania, Latvia) and the countries of the Commonwealth of Independent States (Azerbaijan, Belarus, Kazakhstan, Russia, Georgia, Armenia) and also holds Hungarian local currency bonds with diversification and liquidity management purposes. In case of attractive market conditions (e.g. possible upgrade of an issuer's long-term foreign currency debt rating, change of the yield curve, market mispricing, etc.) the fund may invest in bonds of issuers not listed above. The fund does not intend to invest more than 25% of its assets in a single country. The target weight for the fund's fixed income investments in the above listed countries (target countries) is 95%. The aimed risk profile of the fund is intermediate. We do not use constraints on foreign currency debt ratings. The fund may only conclude derivative transactions for the purpose of hedging or ensuring an efficient portfolio structure. The fund may also hold unleveraged debt-type collective investments linked to derivative indexes. The fund also has the option of taking on a substantial currency exposure, which will ordinarily be fully hedged to the target currency (USD), although depending on market circumstances the fund may even have an open currency position.

MARKET SUMMARY:

Escalating geopolitical concerns around Syria and North Korea combined with some unwinding of Trump reflation trades and the prospect of the French presidential elections towards the end of the month kept risk assets in check for much of April while measures of volatility hit year to date highs. However a market friendly French election result coupled with a strong start to earnings season on both sides of the pond helped risk assets stage a decent rally in the last week to finish with solid returns. Turkish constitutional referendum was also in focus where people voted on replacing the existing parliamentary system with an executive presidency which has been a long-standing proposal of the governing AKP and the current president, Recep Tayyip Erdogan. Politics were also in the limelight in Croatia as a no-confidence vote was filed against Croat Finance Minister Zdravko Maric and led to the breaking up of the ruling coalition. Inflows persisted for EM bond funds in April, hard currency bond funds absorbed USD 4,4 bln and sentiment also improved for the asset class. Thanks to the supporting factors emerging market hard currency bonds managed to post a decent performance in April. We increased our duration in Hungary, decreased our position in Croatia and also somewhat increased our position in Romania as well.

ASSET ALLOCATION OF THE FUND ON 04/30/2017
