Total Net Asset Value of the whole Fund:	13,429,959,527 HUF
Net Asset Value of HUF series:	3,776,904,977 HUF
Net Asset Value per unit:	1.358940 HUF

INVESTMENT POLICY OF THE FUND:

The fund aims to profit from the return on global equity market investments, through share price gains and dividend income. The bulk of its portfolio is made up of the publicly listed shares of foreign companies. When building the fund's portfolio, beyond the minimum statutory requirements, the principles of safety and maximum diversification (the spreading of risk) are observed. Accordingly, the fund primarily buys publicly issued foreign securities that are listed on foreign stock exchanges, and secondarily, it may also invest in shares issued by Hungarian companies. The fund management company, exercising all due care, based on its own judgement and decisions, and while observing the relevant legal provisions and the limitations stipulated in the Fund Documentation, determines the means of utilising the fund's resources, and the weights of the various investments within the portfolio, with a view to ensuring that the fund - in line with our expectations with regard to future risks and returns - achieves its objective in the long term. However, the fund is managed on the premise that when compiling the portfolio, it is shares that determine the nature of the fund. Accordingly, the proportion of shares that may be kept in the fund at any given moment may reach the prevailing statutory maximum. The fund management company is permitted, at its own discretion, to hedge all or a part of its currency risks with forward currency positions, in compliance with the statutory requirements. When compiling the share portfolio, taking into consideration the macroeconomic environment of the investment markets, the aim is to build up a long-term investment portfolio primarily on the basis of fundamental analyses. In accordance with the current legislation, the proportion of shares in the portfolio may be up to 100%.

RISK INDICATORS FOR THE LAST 12 MONTHS:

Annualized standard deviation of the fund's weekly yields: 10.72 %

Annualized standard deviation of the benchmark's weekly yields: 10.71 %

MARKET SUMMARY:

After the slight increase in May, the main equity indices were stagnating in June. Although the technical analyst of JP Morgan expects the culmination in the stock markets during the summer with a correction in Autumn, Deutsche Bank does not project any recession in the next 12 months.

The ECB has reduced its inflation forecast mainly due to the decrease of the oil price. In the British parliamentary elections, the Conservative Party was unable to retain an absolute majority - as a result the Pound decreased sharply. In the second half of the month, the first negotiation and negotiation schedule for Brexit negotiations was launched. In line with expectations, in the second round of the French elections, Emmanuel Macron's party had an absolute majority. At the end of the month, European decision-makers have extended the sanctions against Russia for another 6 months until January 2018.

At the beginning of June, due to the news of rising Libyan production to three-year highs, oil short positions were opened, and by the middle of the month, oil prices decreased led by fears of over-supply, although the launch of the blockade against Qatar had a slight rebounding effect. After the disappointment at the OPEC meeting, oil only returned to level 45 only at the end of the month when it became apparent that the inventory increased by 118k instead of the expected decrease of 2.2 million barrels.

At the beginning of the month, the US long yield dropped to its 2017 low as a result of disappointment with Trump, weak inflation and strengthening yen; furthermore, in the second week of June, Nasdaq turned down. As it was expected, the FED increased the base rate by 25 bps.

In Asia, Japanese market was supported by excellent macro data, while the Chinese H-stocks decreased because of the arrest of Anbang's CEO. In accordance to the MSCI decision in June, the Chinese A-shares were included in MSCI Emerging Market Index, but Argentina was left out.

The European region is preferred in the fund as the European PMI is still strong the earning momentum is still present, the inflow is continuous. Nonetheless, the European market was moving sideways during the month.
