Net Asset Value of institutional series:	839,884,026 HUF
Net Asset Value per unit:	1.066420 HUF

INVESTMENT POLICY OF THE FUND:

The fund is intended to serve as a stable, moderately low-risk form of investment, and to offer investors higher returns than bank deposits over the medium term. The portfolio elements are selected in accordance with the above principles. To ensure liquidity, the fund primarily aims to hold bonds and discount treasury bills issued by the State Debt Management Centre on behalf of the State of Hungary, as well as bonds issued by the National Bank of Hungary. The fund has a low risk profile, but its portfolio may also contain forint-denominated debt securities issued by banks and corporations, which are expected to yield a higher return than government securities. The fund may also keep its liquid assets in bank deposits. Besides this, the fund may hold a limited proportion of foreign-currency instruments in its portfolio, but only subject to the full hedging of currency risk. Aegon Domestic Bond Fund must hold minimum 80% of its assets in HUF-denominated bonds issued by the members of European Economic Area.

MARKET SUMMARY:

Compared to that of previous months, the NBH decreased the amount of the 3-month deposit facility by 25 billion HUF, thus a significantly smaller amount of liquidity squeezed out to the market. On its meeting held at the 24th of October, the MPC did not change the base rate, neither announced any new measures, but anticipated a possibility of further loosening in the future.

As for the secondary market, the decreasing trend in yields remained intact, except for a short correction at the beginning of the month, thus driving bond prices higher. At the actual valuation level, Hungarian govies seem rather rich. However, the monetary policy is committed to drive yields even lower, thus a further flattening of the yield curve can be expected. The overall duration position of the Fund remained unchanged for the month of October.

ASSET ALLOCATION OF THE FUND ON 10/31/2017
