Net Asset Value of HUF series:	5,656,219,539 HUF
Net Asset Value per unit:	1.545987 HUF

INVESTMENT POLICY OF THE FUND:

The fund's investment objective is to provide investors with a higher return than that attainable in the domestic money market, primarily by investing in the bond market of the Central and Eastern European region. The fund's bond investments are mainly concentrated in the corporate and mortgage bond markets, but government securities issued in foreign currency are also potential investment targets. Forint-denominated Hungarian government securities are only held for liquidity management purposes. The fund may also buy into other investment funds that invest in the above markets. The achievement of a higher return than would be attainable in the Hungarian government securities market is made possible by the better diversification, the additional yield from the premiums of the bonds, and, in a favourable market environment, by the price gains resulting from the narrowing of the premiums. The fund's general risk level and the asset allocation between the three main areas of investment is determined on the basis of a regular market analysis and situational analysis relating to four main aspects (fundamentals, valuation levels, market sentiment, technical factors). The in-depth analysis is also an important factor in the selection of the individual securities by region, sector and interest risk. In the course of selecting the individual securities, a thorough financial analysis is also essential to determine the creditworthiness of the issuer. Risk management and the regular monitoring of the issuers are of key importance to the fund. When compiling the fund's portfolio we aim to achieve a moderate risk profile, primarily purchasing investment-grade securities. The fund only buys lower-rated instruments in limited proportions. The fund may only conclude derivative transactions for the purpose of hedging or ensuring an efficient portfolio structure. The fund may also hold unleveraged collective investments linked to derivative indexes. The fund also has the option of taking on a substantial currency exposure, which will ordinarily be fully hedged, although depending on market circumstances the fund may even have an open currency position. The fund management company, exercising all due care, based on its own judgement and decisions, and while observing the relevant legal provisions and the limitations stipulated in the Fund Documentation, determines the means of utilising the fund's resources, and the weights of the various investments within the portfolio, with a view to ensuring that the fund - in line with our expectations with regard to future risks and returns - achieves its objective in the long term.

MARKET SUMMARY:

October was by and large another positive month. Measures of volatility continued to hover near historical lows. The major central bank meeting (ECB) during the month passed without any surprises despite the taper announcement, while expectations of some tax reform progress in the US appeared to help sentiment at the margin. Some turbulence occurred on the core bond markets in the second part of the month as rumors around the next potential FED chair emerged and the market took that as a rather hawkish news. During the month, EM local currency funds witnessed significant outflows on stronger dollar and rising rates, while hard currency funds continued to attract inflows. EM sovereign bond spreads have remained resilient in the face of the news coming from the US. The only turbulence among the EM space was more idiosyncratic. Turkey bonds witnessed downward price pressures as diplomatic ties between the US and the country turned somewhat tense and the Turkish lira also depreciated significantly which added fuel to the fire. Some encouraging news also came to the light from Latin America as Venezuela announced that it made coupon payments for its state-owned oil company, PDVSA. During the month, we increased our positions in Romania and took some profit on our Ukrainian positions.

ASSET ALLOCATION OF THE FUND ON 10/31/2017
