Currency:	EUR
Total Net Asset Value of the whole Fund:	10,406,967 EUR
Net Asset Value of EUR series:	717,795 EUR
Net Asset Value per unit:	1.041936 EUR

INVESTMENT POLICY OF THE FUND:

The fund's investment objective is to provide investors with capital appreciation by investing in the sovereign- and quasi-sovereign bond market of Emerging European countries. The fund has no rating constraints, the fund has a permission to invest in any kind of issuer without limitation on its long-term foreign currency debt rating. The fund aims to reach the highest capital gain with rational risk taking. The fund primarily invests on the sovereign- and quasi-sovereign bond market of Emerging European countries denominated in foreign currency, but holds Hungarian local currency, long- and short-term bonds with diversification and liquidity management purposes. The fund may also invest in mortgage backed securities, and short- and long-term, fixed or floating securities of other financial institutions, municipalities or other business corporations, structured and convertible bonds. The fund's general risk level and the measure of the deviation from the target weights are determined on the basis of a regular market analysis and situational analysis relating to four main aspects (fundamentals, valuation levels, market sentiment, technical factors). The core part of the fund consists of the foreign currency denominated, sovereign and quasi-sovereign bonds of Central and Eastern Europe (Hungary, Croatia, Poland, Romania, Slovakia, Ukraine), Southeast Europe (Serbia, Turkey), Baltic states (Lithuania, Latvia) and the countries of the Commonwealth of Independent States (Azerbaijan, Belarus, Kazakhstan, Russia, Georgia, Armenia) and also holds Hungarian local currency bonds with diversification and liquidity management purposes. In case of attractive market conditions (e.g. possible upgrade of an issuer's long-term foreign currency debt rating, change of the yield curve, market mispricing, etc.) the fund may invest in bonds of issuers not listed above. The fund does not intend to invest more than 25% of its assets in a single country. The target weight for the fund's fixed income investments in the above listed countries (target countries) is 95%. The aimed risk profile of the fund is intermediate. We do not use constraints on foreign currency debt ratings. The fund may only conclude derivative transactions for the purpose of hedging or ensuring an efficient portfolio structure. The fund may also hold unleveraged debt-type collective investments linked to derivative indexes. The fund also has the option of taking on a substantial currency exposure, which will ordinarily be fully hedged to the target currency (USD), although depending on market circumstances the fund may even have an open currency position. The investment policy of the fund changed on the 30th of December, 2016. Since then the fund has no benchmark, and fund performance before the change is not applicable.

2009	10.85 %	2.53 %
2008	-16.05 %	4.11 %

MARKET SUMMARY:

October was by and large another positive month. Measures of volatility continued to hover near historical lows. The major central bank meeting (ECB) during the month passed without any surprises despite the taper announcement, while expectations of some tax reform progress in the US appeared to help sentiment at the margin. Some turbulence occurred on the core bond markets in the second part of the month as rumors around the next potential FED chair emerged and the market took that as a rather hawkish news. During the month, EM local currency funds witnessed significant outflows on stronger dollar and rising rates, while hard currency funds continued to attract inflows. EM sovereign bond spreads have remained resilient in the face of the news coming from the US. The only turbulence among the EM space was more idiosyncratic. Turkey bonds witnessed downward price pressures as diplomatic ties between the US and the country turned somewhat tense and the Turkish lira also depreciated significantly which added fuel to the fire. Some encouraging news also came to the light from Latin America as Venezuela announced that it made coupon payments for its state-owned oil company, PDVSA. During the month, we increased our positions in Romania and took some profit on our Ukrainian positions. We closed somewhat our underweight in Russia and took profit and moved closer to the neutral stance in Ukraine.

ASSET ALLOCATION OF THE FUND ON 10/31/2017

Asset type	Weight
Government bonds	100.96 %
