Net Asset Value of HUF series:	7,605,278,744 HUF
Net Asset Value per unit:	1.499303 HUF

## INVESTMENT POLICY OF THE FUND:

The aim of the fund is to create for its investors an investment portfolio that generates a positive yield under all circumstances; in other words, it takes a 'total return' approach. It does this by using various analysis techniques to select the asset classes and investment funds that have the greatest potential to appreciate in value, and by investing in the shares of investment funds and in collective investment securities. The fund primarily invests its capital in the funds managed by Aegon Hungary Investment Fund Management, but it may also purchase other investment funds and collective investment securities for its portfolio for the purpose of diversification, if the given asset class is not yet covered by the fund management company's own funds. Indirectly, the fund is capable of accessing the entire known investment universe of today through the purchase of investment fund shares (in bond markets, money markets, equity markets, property market, private equity, derivatives and other regulated and OTC derivative products, commodity-market products, currencies etc.), and of making its investments both at domestic and international level. To ensure liquidity, the fund may hold discount treasury bills and government bonds issued by the State Debt Management Centre (ÁKK), interest-bearing securities guaranteed by the State of Hungary, and bonds issued by the National Bank of Hungary. In order to achieve a positive yield, the fund makes active use of risk management procedures and carefully selects the position size of its riskier investments. Since the range of investments includes foreign currency-denominated investments, ETFs and investment fund shares, investors in the fund are also exposed to currency risk. In accordance with our obligation under law, we draw the attention of all investors to the fact that the fund is a fund that invests in other investment funds; in other words, in accordance with its investment policy it may invest more than 80 percent of its assets in investment fund shares or securities issued by other collective investment instruments. However, the fund's portfolio will not contain shares of any single investment fund in a weight of over 20%, except AEGON Money Market Fund, AEGON Domestic Bond Fund, AEGON MoneyMaxx Express Fund, AEGON Alfa Derivative Fund, AEGON Central European Credit Fund and AEGON Özon Capital Protected Fund.

<b>Total:</b>	<b>100%</b>

## MARKET SUMMARY:

Overseas, the tax reform was in the limelight of the markets. At the beginning of the month, it was said that the start of the corporation tax cuts will be put off by 1 year and the Republican majority was also questionable, thus the American market has slumped somewhat. However, after the Senate accepted the draft of the tax reform, the market sentiment became better and the investors pulled the market to a new high level. In line with the expectations, Donald Trump has nominated Jerome Powell as the new chairman of the FED, it is expected that he will continue the current monetary policy. At the beginning of the month, the bank shares have plunged after the US yield curve continued to flatten, on the short side the interest rate rise, while on the long side the low inflation was priced in by the investors. At the end of the month, Powell highlighted that there is no need for further regulation of the financial sector and the existing rules should also be revised, it resulted a rise in the bank shares. There was a drop in the junk bond market in November, caused by the problems of the telecommunication companies, the accelerated outflow and the negative rumour of the issuance companies. In the month, North Korea has broken a two-month period of relative quiet by firing an intercontinental ballistic rocket.

November was a busy month in Europe, the German coalition talks has failed after the CDU/CSU could not agree with the Greens about several questions, but later Angela Merkel invited the German Social Democratic Party (SPD) to negotiate in the hope of forming a government. The first important Brexit agreement was born in November, according to the news, they agreed on the amount of the exit accounts, which could be somewhere between 45 and 55 billion Euros, the next critical issue is the question of the Irish / Northern Irish border.

The Euro strengthened against the Dollar in November, while the Euro was supported by the strong European PM and the positive turn in the German coalition negotiations, the dollar's exchange rate was driven by expectations of interest rate hikes.

There was a little drop in the market of the energy sector, because the Norwegian national Fund could rid of their oil and gas related exposures to reduce their dependence of the sector. Despite this news, the crude oil has closed a positive month, after the oil reserves have fallen and Russia and the OPEC have extended the daily 1.8 million barrel oil production cuts by the end of 2018.

In November, the fund closed in the negative territory due to the weaker performance of the total return portfolios. Because of their higher relative weight, the Alfa and Maraton fund had a negative effect on the fund's performance, while the best performers were Bondmaxx and Domestic Bond Fund this month.
