Total Net Asset Value of the whole Fund:	10,484,235 EUR
Net Asset Value of institutional series:	2,994,558,131 HUF
Net Asset Value per unit:	1.048712 HUF

INVESTMENT POLICY OF THE FUND:

The fund's investment objective is to provide investors with capital appreciation by investing in the sovereign- and quasi-sovereign bond market of Emerging European countries. The fund has no rating constraints, the fund has a permission to invest in any kind of issuer without limitation on its long-term foreign currency debt rating. The fund aims to reach the highest capital gain with rational risk taking. The fund primarily invests on the sovereign- and quasi-sovereign bond market of Emerging European countries denominated in foreign currency, but holds Hungarian local currency, long- and short-term bonds with diversification and liquidity management purposes. The fund may also invest in mortgage backed securities, and short- and long-term, fixed or floating securities of other financial institutions, municipalities or other business corporations, structured and convertible bonds. The fund's general risk level and the measure of the deviation from the target weights are determined on the basis of a regular market analysis and situational analysis relating to four main aspects (fundamentals, valuation levels, market sentiment, technical factors). The core part of the fund consists of the foreign currency denominated, sovereign and quasi-sovereign bonds of Central and Eastern Europe (Hungary, Croatia, Poland, Romania, Slovakia, Ukraine), Southeast Europe (Serbia, Turkey), Baltic states (Lithuania, Latvia) and the countries of the Commonwealth of Independent States (Azerbaijan, Belarus, Kazakhstan, Russia, Georgia, Armenia) and also holds Hungarian local currency bonds with diversification and liquidity management purposes. In case of attractive market conditions (e.g. possible upgrade of an issuer's long-term foreign currency debt rating, change of the yield curve, market mispricing, etc.) the fund may invest in bonds of issuers not listed above. The fund does not intend to invest more than 25% of its assets in a single country. The target weight for the fund's fixed income investments in the above listed countries (target countries) is 95%. The aimed risk profile of the fund is intermediate. We do not use constraints on foreign currency debt ratings. The fund may only conclude derivative transactions for the purpose of hedging or ensuring an efficient portfolio structure. The fund may also hold unleveraged debt-type collective investments linked to derivative indexes. The fund also has the option of taking on a substantial currency exposure, which will ordinarily be fully hedged to the target currency (USD), although depending on market circumstances the fund may even have an open currency position. The investment policy of the fund changed on the 30th of December, 2016. Since then the fund has no benchmark, and fund performance before the change is not applicable.

MARKET SUMMARY:

December proved to be a solid end to a strong year for the majority of asset classes and emerging market hard currency bonds were no exception from that. The main focus in the relatively calm month was if and how the US tax bill might be passed in the Senate and the House of Representatives. The latest tax bill proposal went through smoothly and was signed by President Trump on December 22. The act will increase the total budget deficit by about USD 1 trillion over ten years and GDP will be 0,8% higher on average each year during the 2018-2027 period according to the Senate bill analyses. As news emerged of the possible passing of the bill UST 10year yield dropped in the upcoming trading dates and finished the month 9 basispoints lower from December 20. EM bonds followed the move but closed the month by 2 basispoints tightening overall. Overall sentiment did not change and inflows still persisted in the last month for EM bond funds however in a somewhat tepid manner. We sold some Romanian and Polish papers and bought some Hungarian ones during the month.

ASSET ALLOCATION OF THE FUND ON 12/31/2017
