Net Asset Value of institutional series:	10,867,303,029 HUF
Net Asset Value per unit:	1.061535 HUF

INVESTMENT POLICY OF THE FUND:

The fund's aim is to assemble an investment portfolio for its investors that is comprised of both Hungarian and international money and capital-market instruments, which the fund can optimise through ongoing dynamic asset allocation in order to attain the highest possible yield. The fund is a 'total-return fund', which means that instead of concentrating on just one subsector of the money or capital market, at any given moment it focuses its investments on the area that holds the promise of the highest possible return. Accordingly, the fund may hold government securities and discount treasury bills issued by the State Debt Management Centre (ÁKK) on behalf of the State of Hungary, as well as bonds issued by the National Bank of Hungary, and also bank and corporate bonds that are low risk but are nevertheless likely to earn a higher return than government securities. Besides these the fund's portfolio may also contain shares listed on the domestic stock exchange and the bourses of OECD countries, as well as the government securities, bank and corporate bonds of OECD countries. The fund does not follow a fixed benchmark, and does not adhere to a permanent ratio of shares to bonds, but aims to constantly change this ratio within a broad range; indeed, it is also prepared to take on currency risk (just as international bond/equity funds tend to) through the purchase of international government securities and equities. At the same time, the fund maintains the option to hedge currency risks.

DISTRIBUTORS

Aegon Magyarország Befektetési Alapkezelő Zrt., Raiffeisen Bank Zrt., Unicredit Bank Hungary Zrt.

Risk and Reward Profile:

MARKET SUMMARY:

Market performance was mixed in the last month of the year. As the US tax reform was passed, both US stock and US treasury yields increased. The European stock markets underperformed their overseas counterparts, while the weak USD and increasing oil price had a positive effect on emerging markets. Given that the majority of the equity position held is comprised of European indices, market movements deteriorated the performance of the Fund. EM positions are hedged against yield increases, therefore our credit assets had a strong performance. As for our local currency positions, profit was taken on Romanian govies.

ASSET ALLOCATION OF THE FUND ON 12/31/2017
