| Net Asset Value of institutional series: | 522,386,824 HUF |
| Net Asset Value per unit: | 1.067886 HUF |

INVESTMENT POLICY OF THE FUND:

The fund is intended to serve as a stable, moderately low-risk form of investment, and to offer investors higher returns than bank deposits over the medium term. The portfolio elements are selected in accordance with the above principles. To ensure liquidity, the fund primarily aims to hold bonds and discount treasury bills issued by the State Debt Management Centre on behalf of the State of Hungary, as well as bonds issued by the National Bank of Hungary. The fund has a low risk profile, but its portfolio may also contain forint-denominated debt securities issued by banks and corporations, which are expected to yield a higher return than government securities. The fund may also keep its liquid assets in bank deposits. Besides this, the fund may hold a limited proportion of foreign-currency instruments in its portfolio, but only subject to the full hedging of currency risk. Aegon Domestic Bond Fund must hold minimum 80% of its assets in HUF-denominated bonds issued by the members of European Economic Area.

MARKET SUMMARY:

Yields continued to climb higher early in the month with some stabilisation later mirroring core market moves. After the January MIRS tender-driven correction the central bank took a more passive stance regarding the long end of the curve. This leaves the long-end with few reasons to rally given higher rates globally. We have to admit though that valuations vs regional markets improved significantly but we see no imminent trigger for a rally.

ASSET ALLOCATION OF THE FUND ON 02/28/2018
