Net Asset Value of institutional series:	20,792,348,889 HUF
Net Asset Value per unit:	1.585768 HUF

INVESTMENT POLICY OF THE FUND:

The fund's investment objective is to provide investors with a higher return than that attainable in the domestic money market, primarily by investing in the bond market of the Central and Eastern European region. The fund's bond investments are mainly concentrated in the corporate and mortgage bond markets, but government securities issued in foreign currency are also potential investment targets. Forint-denominated Hungarian government securities are only held for liquidity management purposes. The fund may also buy into other investment funds that invest in the above markets. The achievement of a higher return than would be attainable in the Hungarian government securities market is made possible by the better diversification, the additional yield from the premiums of the bonds, and, in a favourable market environment, by the price gains resulting from the narrowing of the premiums. The fund's general risk level and the asset allocation between the three main areas of investment is determined on the basis of a regular market analysis and situational analysis relating to four main aspects (fundamentals, valuation levels, market sentiment, technical factors). The in-depth analysis is also an important factor in the selection of the individual securities by region, sector and interest risk. In the course of selecting the individual securities, a thorough financial analysis is also essential to determine the creditworthiness of the issuer. Risk management and the regular monitoring of the issuers are of key importance to the fund. When compiling the fund's portfolio we aim to achieve a moderate risk profile, primarily purchasing investment-grade securities. The fund only buys lower-rated instruments in limited proportions. The fund may only conclude derivative transactions for the purpose of hedging or ensuring an efficient portfolio structure. The fund may also hold unleveraged collective investments linked to derivative indexes. The fund also has the option of taking on a substantial currency exposure, which will ordinarily be fully hedged, although depending on market circumstances the fund may even have an open currency position. The fund management company, exercising all due care, based on its own judgement and decisions, and while observing the relevant legal provisions and the limitations stipulated in the Fund Documentation, determines the means of utilising the fund's resources, and the weights of the various investments within the portfolio, with a view to ensuring that the fund - in line with our expectations with regard to future risks and returns - achieves its objective in the long term.

MARKET SUMMARY:

March proved to be another rough month for global risk assets, with equity markets in particular feeling the brunt of the selling. The tit-for-tat tariff moves between the US and China, the ongoing reshuffle at the White House, a tech tantrum centred on Facebook but spreading across the rest of the sector and signs of abating global growth following the March PMIs all played a part in one way or another. Volatility also remained high in March after February's exceptional swing. The Fed hiked policy rates by 25bp in March. New projections signalled two more hikes this year, and a total of three for 2019, from two in its previous forecast. Market took the projections and the comments from the new chair, Jerome Powell a bit more dovishly and US treasury bonds managed to decrease in yield after the announcement. Even though this way some pressure has eased on emerging market bonds, the overall anxious investment mood had an overall negative effect on the asset class. EM sovereign bond yield spreads have widened by 18 basispoints overall in the month on the back of the somewhat negative sentiment. The fact that outflows returned to the asset class did not help the overall fragile situation. The overall risk in the fund remained unchanged, we still refrain from taking on excessive risk in the fund.

ASSET ALLOCATION OF THE FUND ON 03/31/2018
