Net Asset Value of HUF series:	23,206,130,832 HUF
Net Asset Value per unit:	2.697241 HUF

INVESTMENT POLICY OF THE FUND:

The fund's aim is to assemble an investment portfolio for its investors that is comprised of both Hungarian and international money and capital-market instruments, which the fund can optimise through ongoing dynamic asset allocation in order to attain the highest possible yield. The fund is a 'total-return fund', which means that instead of concentrating on just one subsector of the money or capital market, at any given moment it focuses its investments on the area that holds the promise of the highest possible return. Accordingly, the fund may hold government securities and discount treasury bills issued by the State Debt Management Centre (ÁKK) on behalf of the State of Hungary, as well as bonds issued by the National Bank of Hungary, and also bank and corporate bonds that are low risk but are nevertheless likely to earn a higher return than government securities. Besides these the fund's portfolio may also contain shares listed on the domestic stock exchange and the bourses of OECD countries, as well as the government securities, bank and corporate bonds of OECD countries. The fund does not follow a fixed benchmark, and does not adhere to a permanent ratio of shares to bonds, but aims to constantly change this ratio within a broad range; indeed, it is also prepared to take on currency risk (just as international bond/equity funds tend to) through the purchase of international government securities and equities. At the same time, the fund maintains the option to hedge currency risks.

RISK INDICATORS FOR THE LAST 12 MONTHS:

Annualized standard deviation of the fund's weekly yields: 1.52 %
Annualized standard deviation of the benchmark's weekly yields: 0.08 %

MARKET SUMMARY:

March proved to be another rough month for global risk assets, with equity markets in particular feeling the brunt of the selling which had a negative effect on the fund's performance. The tit-for-tat tariff moves between the US and China, the ongoing reshuffle at the White House, a tech tantrum centred on Facebook but spreading across the rest of the sector and signs of abating global growth following the March PMIs all played a part in one way or another. Volatility also remained high in March after February's exceptional swing. The Fed hiked policy rates by 25bp in March. New projections signalled two more hikes this year, and a total of three for 2019, from two in its previous forecast. Market took the projections and the comments from the new chair, Jerome Powell a bit more dovishly and US treasury bonds managed to decrease in yield after the announcement. We were stopped out of our long equity exposure as important technical levels were breached in the high volatility environment.

ASSET ALLOCATION OF THE FUND ON 03/31/2018
