Net Asset Value of HUF series:	25,321,015,866 HUF
Net Asset Value per unit:	5.310412 HUF

INVESTMENT POLICY OF THE FUND:

The fund is intended to serve as a stable, moderately low-risk form of investment, and to offer investors higher returns than bank deposits over the medium term. The portfolio elements are selected in accordance with the above principles. To ensure liquidity, the fund primarily aims to hold bonds and discount treasury bills issued by the State Debt Management Centre on behalf of the State of Hungary, as well as bonds issued by the National Bank of Hungary. The fund has a low risk profile, but its portfolio may also contain forint-denominated debt securities issued by banks and corporations, which are expected to yield a higher return than government securities. The fund may also keep its liquid assets in bank deposits. Besides this, the fund may hold a limited proportion of foreign-currency instruments in its portfolio, but only subject to the full hedging of currency risk. Aegon Domestic Bond Fund must hold minimum 80% of its assets in HUF-denominated bonds issued by the members of European Economic Area.

Risk and Reward Profile:

MARKET SUMMARY:

Government bond yields rose significantly in May. Capital outflows from emerging markets, political crisis in Italy weighed on Hungarian asset prices as well. The depreciating HUF and higher short yields also made investors less convinced that the current monetary policy stance of the central bank is sustainable. High supply and higher oil prices did not help the market either. Short yields rose by 10-30 bps while long yields were up by 50 bps in May.

ASSET ALLOCATION OF THE FUND ON 05/31/2018
