Total Net Asset Value of the whole Fund:	28,461,803,898 HUF
Net Asset Value of CZK series:	98,520 CZK
Net Asset Value per unit:	0.985204 CZK

INVESTMENT POLICY OF THE FUND:

The fund's investment objective is to provide investors with a higher return than that attainable in the domestic money market, primarily by investing in the bond market of the Central and Eastern European region. The fund's bond investments are mainly concentrated in the corporate and mortgage bond markets, but government securities issued in foreign currency are also potential investment targets. Forint-denominated Hungarian government securities are only held for liquidity management purposes. The fund may also buy into other investment funds that invest in the above markets. The achievement of a higher return than would be attainable in the Hungarian government securities market is made possible by the better diversification, the additional yield from the premiums of the bonds, and, in a favourable market environment, by the price gains resulting from the narrowing of the premiums. The fund's general risk level and the asset allocation between the three main areas of investment is determined on the basis of a regular market analysis and situational analysis relating to four main aspects (fundamentals, valuation levels, market sentiment, technical factors). The in-depth analysis is also an important factor in the selection of the individual securities by region, sector and interest risk. In the course of selecting the individual securities, a thorough financial analysis is also essential to determine the creditworthiness of the issuer. Risk management and the regular monitoring of the issuers are of key importance to the fund. When compiling the fund's portfolio we aim to achieve a moderate risk profile, primarily purchasing investment-grade securities. The fund only buys lower-rated instruments in limited proportions. The fund may only conclude derivative transactions for the purpose of hedging or ensuring an efficient portfolio structure. The fund may also hold unleveraged collective investments linked to derivative indexes. The fund also has the option of taking on a substantial currency exposure, which will ordinarily be fully hedged, although depending on market circumstances the fund may even have an open currency position. The fund management company, exercising all due care, based on its own judgement and decisions, and while observing the relevant legal provisions and the limitations stipulated in the Fund Documentation, determines the means of utilising the fund's resources, and the weights of the various investments within the portfolio, with a view to ensuring that the fund - in line with our expectations with regard to future risks and returns - achieves its objective in the long term.

RISK INDICATORS FOR THE LAST 12 MONTHS:

Annualized standard deviation of the fund's weekly yields: 0.98 %
Annualized standard deviation of the benchmark's weekly yields: 0.11 %

MARKET SUMMARY:

Although the month of May featured a mini EM-collapse, ongoing trade disputes between US and China and geopolitical tensions there is little doubt that the month will be best remembered for the Italian political developments in the last week or so. The mini EMsell-off was basically triggered as the US dollar managed to strengthen continuously throughout the month and got close to 1,15 against the EUR. The severely hit EM currencies were Argentine peso and the Turkish lira as these countries are heavily reliant on dollar funding and have a significant currency exposure. It also fueled the fire on the lira when the government revealed that it will increase fiscal spending, which spurred anxiety around the budget that already shows signs of imbalance. The central bank had to hike the governing interest rate by 300 basis points in order to stop the weakening of the lira. But to overall negative sentiment also impacted other EM countries as well. We decreased our Turkey and Croatian exposure and bought some Polish local bonds as well and left the currency exposure unhedged.
