Net Asset Value of HUF series:	114,472,436 HUF
Net Asset Value per unit:	1.587229 HUF

## INVESTMENT POLICY OF THE FUND:

The aim of the investment fund is to give investors access to the Polish bond market and to function as a relatively stable, medium-risk investment already medium term, offering our customers stable real returns without the need to tie up their savings for a fixed period. The fund primarily invests into Zloty denominated Polish government bonds but the portfolio manager has some room to use other fixed income investments. We aim to maximise returns with the given risk level. Our investment decisions are based on fundamental research extended by technical research while we also take into account global market sentiment. Expected shifts in the yield curve based on our macro expectations are at the core of our investment process. Risk/return characteristics are also considered when we select suitable and safe investments. We aim to totally hedge any currency risk in the fund.

## MARKET SUMMARY:

In May global developments played the most important role. Oil prices increased further, the USD appreciated, EM sold-off and bond yields kept moving higher. Polish bond yields increased in parallel with the global bond yields, but strong macro/low issuance need/dovish central bank shielded the Polish local market quite well: Polish yields increased by only ~10bps during the month (at the top, the maximum was ~20bps). Closer to the end of the month Italian panic started: core market bond yields fell, periphery bond yields jumped changing the global bond sell-off to a classic risk-off mood. During the month, we started to invest in Hungarian government bonds and quasi-sovereign papers, as yield levels seem to be oversold and hedged back to PLN it offers a good value and carry position according to our opinion.
