Currency:	PLN
Total Net Asset Value of the whole Fund:	20,090,753 PLN
Net Asset Value of institutional series:	311,570 PLN
Net Asset Value per unit:	1.101231 PLN

INVESTMENT POLICY OF THE FUND:

The Fund's goal is to offer a stable and predictable yield at a low risk level for the investors. According to this the fund is only allowed to hold fixed income securities, which were primarily issued or guaranteed by Poland. To a limited extent it is allowed to buy bonds issued by the European Union (and its institutions), the European Central Bank, or the European Investment Bank, if the security is denominated in PLN and its credit rating is at least equal to Poland's rating. Securities issued or guaranteed by Poland can be held regardless of the credit rating up to 100% of the NAV. Maximum allowed duration of the fund is 0.5 year, while maximum weighted average maturity of the portfolio is 1 year. The Fund must limit investment in securities to those with a residual maturity until the legal redemption date of less than or equal to 2 years, provided that the time remaining until the next interest rate reset date is less than or equal to 397 days. To ensure liquidity the fund can also place bank deposits. All of the assets held by the fund are denominated in PLN.

MARKET SUMMARY:

In May global developments played the most important role. Oil prices increased further, the USD appreciated, EM sold-off and bond yields kept moving higher. Polish bond yields increased in parallel with the global bond yields, but strong macro/low issuance need/dovish central bank shielded the Polish local market quite well: Polish yields increased by only ~10bps during the month (at the top, the maximum was ~20bps). Closer to the end of the month Italian panic started: core market bond yields fell, periphery bond yields jumped changing the global bond sell-off to a classic risk-off mood.

ASSET ALLOCATION OF THE FUND ON 05/31/2018

Asset type	Weight
T-bills	29.71 %
