Net Asset Value of PLN series:	36,410,445 PLN
Net Asset Value per unit:	1.178489 PLN

## INVESTMENT POLICY OF THE FUND:

The fund's investment objective is to provide investors with a higher return than that attainable in the domestic money market, primarily by investing in the bond market of the Central and Eastern European region. The fund's bond investments are mainly concentrated in the corporate and mortgage bond markets, but government securities issued in foreign currency are also potential investment targets. Forint-denominated Hungarian government securities are only held for liquidity management purposes. The fund may also buy into other investment funds that invest in the above markets. The achievement of a higher return than would be attainable in the Hungarian government securities market is made possible by the better diversification, the additional yield from the premiums of the bonds, and, in a favourable market environment, by the price gains resulting from the narrowing of the premiums. The fund's general risk level and the asset allocation between the three main areas of investment is determined on the basis of a regular market analysis and situational analysis relating to four main aspects (fundamentals, valuation levels, market sentiment, technical factors). The in-depth analysis is also an important factor in the selection of the individual securities by region, sector and interest risk. In the course of selecting the individual securities, a thorough financial analysis is also essential to determine the creditworthiness of the issuer. Risk management and the regular monitoring of the issuers are of key importance to the fund. When compiling the fund's portfolio we aim to achieve a moderate risk profile, primarily purchasing investment-grade securities. The fund only buys lower-rated instruments in limited proportions. The fund may only conclude derivative transactions for the purpose of hedging or ensuring an efficient portfolio structure. The fund may also hold unleveraged collective investments linked to derivative indexes. The fund also has the option of taking on a substantial currency exposure, which will ordinarily be fully hedged, although depending on market circumstances the fund may even have an open currency position. The fund management company, exercising all due care, based on its own judgement and decisions, and while observing the relevant legal provisions and the limitations stipulated in the Fund Documentation, determines the means of utilising the fund's resources, and the weights of the various investments within the portfolio, with a view to ensuring that the fund - in line with our expectations with regard to future risks and returns - achieves its objective in the long term.

## RISK INDICATORS FOR THE LAST 12 MONTHS:

Annualized standard deviation of the fund's weekly yields: 0.95 %  
Annualized standard deviation of the benchmark's weekly yields: 0.14 %

## MARKET SUMMARY:

July has proven to be a fairly decent month for risky assets with the only laggard being commodities. This partly reflected the demand-supply dynamic in oil, while the lack of any easing in the US-China trade war saw metals fall. The trade situation also played a part in the Chinese Yuan weakening. As the emerging market currencies managed to stabilize against the USD after many months of weakening, EM bonds also had a decent performance in July. Thanks to the somewhat improved sentiment capital outflows have turned and we saw some slight inflow into the asset class. Within Europe Ukraine saw the most improvement as favourable news came out regarding the amendments of the anti-corruption court law that is a prerequisite for the next tranche of the IMF money. The main underperformer in the region was Turkey as the new appointments in the cabinet was something that the market handled with concern as Erdogan named his son-in-law as Economy Chief. In the month behind us we decreased our Russian, Croatian and Turkish exposure and bought some Hungarian local currency bonds.

## ASSET ALLOCATION OF THE FUND ON 07/31/2018
