Net Asset Value of institutional series:	100,774,772 PLN
Net Asset Value per unit:	1.251909 PLN

INVESTMENT POLICY OF THE FUND:

The aim of the investment fund is to give investors access to the Polish bond market and to function as a relatively stable, medium-risk investment already medium term, offering our customers stable real returns without the need to tie up their savings for a fixed period. The fund primarily invests into Zloty denominated Polish government bonds but the portfolio manager has some room to use other fixed income investments. We aim to maximise returns with the given risk level. Our investment decisions are based on fundamental research extended by technical research while we also take into account global market sentiment. Expected shifts in the yield curve based on our macro expectations are at the core of our investment process. Risk/return characteristics are also considered when we select suitable and safe investments. We aim to totally hedge any currency risk in the fund.

RISK INDICATORS FOR THE LAST 12 MONTHS:

Annualized standard deviation of the fund's weekly yields:	1.83 %
Annualized standard deviation of the benchmark's weekly yields:	1.80 %

MARKET SUMMARY:

Polish government bond yields were quite stable during July, yields closed the month a little bit lower. Economic activity improved again, signalling probably a growth that is higher than 5%, which is slightly negative for bonds. Inflation is 2% y/y but may decrease in the coming months because of the base effects. Regional valuation deteriorated a lot and levels seems to be stretched. The Monetary Policy Council remained dovish, however some members did not rule out a possible rate change later. We think that governor Glapinski still reflects the majority vote and as a result we do not expect any rate hike soon. We stay cautious mainly because of the valuation, however the government sits on a big pile of cash and the budget was still in surplus after May, so a bigger underweight is not justified yet. We continued to rotate from shorter Polgbs to shorter Hungarian government bonds, as we think, the sell-off in Hungary went too far and yields offer a good carry hedged back to PLN.

ASSET ALLOCATION OF THE FUND ON 07/31/2018
