INVESTMENT POLICY OF THE FUND:

The Fund's goal is to offer a stable and predictable yield at a low risk level for the investors. According to this the fund is only allowed to hold fixed income securities, which were primarily issued or guaranteed by Poland. To a limited extent it is allowed to buy bonds issued by the European Union (and its institutions), the European Central Bank, or the European Investment Bank, if the security is denominated in PLN and its credit rating is at least equal to Poland's rating. Securities issued or guaranteed by Poland can be held regardless of the credit rating up to 100% of the NAV. Maximum allowed duration of the fund is 0.5 year, while maximum weighted average maturity of the portfolio is 1 year. The Fund must limit investment in securities to those with a residual maturity until the legal redemption date of less than or equal to 2 years, provided that the time remaining until the next interest rate reset date is less than or equal to 397 days. To ensure liquidity the fund can also place bank deposits. All of the assets held by the fund are denominated in PLN.

MARKET SUMMARY:

Polish government bond yields were quite stable during July, yields closed the month a little bit lower. Economic activity improved again, signalling probably a growth that is higher than 5%, which is slightly negative for bonds. Inflation is 2% y/y but may decrease in the coming months because of the base effects. Regional valuation deteriorated a lot and levels seems to be stretched. The Monetary Policy Council remained dovish, however some members did not rule out a possible rate change later. We think that governor Glapinski still reflects the majority vote and as a result we do not expect any rate hike soon. We stay cautious mainly because of the valuation, however the government sits on a big pile of cash and the budget was still in surplus after May, so a bigger underweight is not justified yet.
